Gasoline Engine Superiority

When a man invests in a farm power, he owes it to himself to get the best that can be bought for the money.
The modern business farm can no longer be successfully operated without a power of some kind.
The best, most economical, and safest farm power is a gasoline engine.
The best engine is the

I. H. C. Gasoline Engine.

Why? Well, because it's so simple, easily kept in order and operated definitely. It develops the full rated horse power and sustains it against the heaviest load. It is safer, cheaper and more efficient than steam power.
It is adaptable to any and every use requiring a power.
Among its many uses may be named:

Shelling, Husking and Shredding Corn; Grinding Feed; Cutting Dry Fodder and Ensilage; Pumping; Sawing Wood; Separating Cream, Etc.

I. H. C. engines are made in the following styles and sizes:
Vertical, 2, 3, 5 Horse Power.
Horizontal, Portable and Stationary, 4, 6, 8, 10, 12, 15 Horse Power.

If not intending to purchase an engine now, you may want one in the future and really ought to know more about them.
