will go anywhere and has the power behind it—it pulls up to 6 bottoms in stubble—harrows, discs, hauls, bales and makes roads.

It's handy, easy to run and of light weight. It does the work of a dozen horses, and goes almost anywhere a team can go and brings money back with it.

It will pay you to see this tractor—it will be of service every day in the year.

in calf with Lily White, by Chapleton Snowstorm. The fourth winner in the Derby, belonging to T. C. Lindsay, was second in this class, and Wm. Howie came third. Bulls were judged by Robert Hunter, Kirkbean, Dumfries. In the aged class, Thos. Barr led with Commander, a big, massive bull, of good character, bred by Mr. Lindsay; second was John Slater's three-year-old, Success, by Prince Imperial. In a good class of two-year-olds, James Howie was first with his winning Stirk of last year, sired by Budget. He is now a big, level, well-balanced bull, with plenty of quality and style, sired by Ardgowan Budget, out of a cow by the famous Hillhouse bull, Erin-go-Bragh. James Kennedy, Auchinleck, was second with President, his Mortain Mains-bred bull, which won at Cummock, by Auchinbrain Pluto. In a fair class of yearlings, Thos. Barr led with Perfect Peace, a well-grown, home-bred bull, by Hobsland Masterpiece, which was champion at Toronto last year, shown by R. R. Ness, Howick, Que. Wm. Middlemass came second with Benboch Denis, a brown and white home-bred bull, and Mr. Barr had third with a son of Lord Darnley. The awards went in the same order in the Derby class for yearling bulls. The male championship was awarded James Howie's winning two-year-old, with the Hobsland yearling as reserve. The female championship went to James Howie's two-year-old heifer, the Derby winner being reserve.

Questions and Answers.

1st.—Questions asked by bona-fide subscribers to "The Farmer's Advocate" are answered in this department free.
2nd.—Questions should be clearly stated and plainly written, on one side of the paper only, and must be accompanied by the full name and address of the writer.
3rd.—In Veterinary questions the symptoms especially must be fully and clearly stated, otherwise satisfactory replies cannot be given.
4th.—When a reply by mail is required to urgent veterinary or legal enquiries, \$1.00 must be enclosed.

Veterinary.

Crippled Pigs.

Sow has a litter five weeks old still nursing. Some of them, a few minutes after eating, go away and drop as though weak in their backs.

J. C. J.

Ans.—This is due to high feeding and want of exercise. Give each 2 table-spoonfuls of raw linseed oil, and turn them out on a grass plot every fine day.

V.

ALWAYS THE WAY.

William was lying on his bed, face downward, sobbing desolately. His mother took him in her arms, the whole eight years of him. In a few minutes she learned all. It was a girl, and she had sent him a note.

"Dere Willyum—

"I luv yu the best But Henery givs me the most candy.—ISABEL."

An Irish horse dealer is said to have sold a mare as sound in wind and limb and without a fault. It afterward appeared that the poor beast could not see at all out of one eye, and was almost blind in the other.

The purchaser, finding this, made heavy complaints to the dealer, and reminded him that he engaged the mare to be without fault.

"To be sure," replied the other, "to be sure I did, but then, my dear, the poor creature's blindness is not her fault, but her misfortune."

Ernest H. Coulter, author of "The Children in the Shadow," tells of a lecture he delivered in Toronto not long ago. Throughout his talk he referred to mankind as "man." After he had finished, a woman, who looked as though she might have been a militant advocate of woman's suffrage, accosted him.

"You have been speaking about man, man, man, all the evening. Now where does woman come in?"

"Madam," replied Mr. Coulter in a conciliating tone, "man embraces woman."

BOVRIL

Is a Simple Natural Food

A daily cup of BOVRIL is very valuable during spring. It supplies energy and power to digest and assimilate food.

BOVRIL makes rich red blood.

John Deere Spreader

The Spreader with the Beater on the Axle

Take any manure spreader you have ever seen, remove all the clutches and chains, all the countershafts and stub axles, do away with all adjustments and mount the beater on the rear axle. Rebuild the spreader so that the top of the box is only as high as your hips. Make it stronger. Remove some two hundred trouble-giving parts and throw them away. You will have some sort of an idea of what the John Deere Spreader, the Spreader with the Beater on the Axle, is like.

The Beater on the Axle

The beater and all its driving parts are mounted on the rear axle. This construction is patented. You cannot get it on any other spreader made.

Power to drive the beater is taken from the rear axle through a planetary transmission (like that on automobiles). It is positive, runs in oil, and does not get out of order.

Few Working Parts

The John Deere Spreader is so simple that there are no adjustments. It has some two hundred less parts than the simplest spreader heretofore made.

There are no clutches to throw it into gear. The lever at the driver's right is moved back until the finger, or dog, engages a large stop at the rear of the machine. All the chains and adjustments have been done away with.

Only "Hip-High"

Because the beater is mounted on the rear axle, it is only "hip-high" to the top of the box. Each forkful of manure is put just where it is needed. You can always see into the spreader.

Roller bearings, few working parts, the center of the load comparatively near the horses, and the weight distributed over four wheels, make the John Deere Spreader light draft.

Spreader Data Free—Tells about manure, when and how to use it, how to store it, and a description of the John Deere Spreader. Ask for this data as Package No. Y 119
