Fistula and Poll Evil

Any person, however inexperienced, can readily cure either disease with Fleming's

Fistula and Poll Evil Cure
even bad old cases that skilled doctors have abandoned. Easy and simple, no cutting; just a little attention every fifth day—and your money refunded if it ever fails. Cures most cases within thirty days, leaving the horse sound and smooth. All particulars given in Fleming's Vest-Pocket Veterinary Adviser. Write us for a free copy. Ninety-six pages, covering more than a hundred veterinary subjects. Durable bound, indexed and illustrated.

FLEMING BROS., Chemists,
75 Church Street, Toronto, Ont.

DR. PAGE'S ENGLISH SPAVIN CURE

For the cure of Spavins, Ringbone, Curbs, Splints, Windgalls, Capped Hock, Strains or Bruises, Thick Neck from Distemper, Ringworm on cattle, and to remove all unnatural enlargements. This preparation, unlike others, acts by absorbing rather than blistering. This is the only preparation in the world guaranteed to kill a Ringbone or any Spavin, or money refunded, and will not kill the hair. Manufactured by Dr. Frederick A. Page & Son, 7 and 9 York-shire Road, London, E. C. Mailed to any address upon receipt of price \$1.00. Canadian agents:

P. O. and Station, Campbellford, Ontario.

When writing mention Advocate

Questions and Answers.
Miscellaneous.

O. A. C. No. 72 Oats.

I read in a recent issue of your paper an account of a field of oats of the O. A. C. No. 72 variety grown at "Weldwood." Would like to know whether it would be possible for me to get two bushels from you, and what the price would be? They could be shipped by freight. Would like to know whether they are free from birdweed and sow thistle?

L. K.

Ans.—It was not a field but just a plot of O. A. C. 72 oats we grew at "Weldwood" this year. We could not secure seed to grow more. We planned to keep all the produce of this plot for home sowing. Parties having seed of this variety for sale should advertise it.

Septic Tank.

I was much interested in the subject "Sewage Disposal on the Farm."

1. Is there no danger of frost interfering with the working of the septic tank?

2. Have you anything to support the tement top on the tank?

3. If I should place tank 125 ft. from house, how much fall should pipes have? Would common field tile do to drain away from tank?

G. J.

Ans.—1. With a tank built as described and set into the earth, covered over a little, if thought necessary, there should be no trouble from freezing. Much of the fluid entering it is warm, or at least not very cold. Warmth facilitates the process, we believe. Ours worked all right last winter unprotected as shown in cut.

2. A little woven-wire fencing may be used. If we remember correctly, the contractor used none in ours. A good slab of concrete is sufficient.

3. A foot and a half if possible. Certainly not less than a foot.

Gossip.

J. H. Truman, England, says the London Live Stock Journal, has had a cable advising him of the arrival at Bushnell, Ill., of his shipment of show horses for the Chicago International Exhibition, including Belgians, Percherons, Shires and Suffolks.

At an auction sale of Berkshire swine, the property of W. S. Corsa, Whitehall, Illinois, August 19th last, good prices are reported, 44 head having sold for an average price of \$107. The highest price attained was \$140 each for two sows, two others bringing \$100 and \$125, respectively.

That mixed farming saves farmers from land liens was the chief evidence given by practical agriculturists before the Saskatchewan Government's Commission appointed to enquire into the conditions of agricultural credit throughout the Province, at their sitting at Prince Albert, and their evidence was fully confirmed by the representatives of the banks present. Every effort is being made to encourage mixed farming in that district, and in addition to the modern creamery which will be opened next month, a Provincial company has amalgamated with the Cold Storage Company there and will erect an up-to-date abattoir, capable of handling ten carloads of cattle per day, and will also establish a tannery, a canning factory, and a soap factory in connection with its works.

"I am sorry, madam," said the judge, addressing the convicted suffragette, "but I must commit you to jail for ten days. If you have any requests to make of the Court before sentence is executed I shall be glad to hear them."

"Oh no, Judge, thank you," said the lady. "There isn't anything, except, perhaps, if you don't mind, I'd like to have my maid committed to the same jail, and if you could arrange it so as to give us connecting cells with a bath it would be charming of you."

MacTavish (to expectant porter, who had been ten minutes looking after his heavy luggage):—"Mon, a' conseeder ye've ben verra obligeing. Wull ye take a wee peench o' snuff?"—John Bull.

The Crown

This is a light-draft, heavy-service plow for use on those farms running to clay. Wheels have dust-proof roller bearings. Lever furrow straighteners are in easy reach. In this model, our idea was to give the maximum strength for difficult service, without designing an unmanageable or heavy plow. This strength is mostly attained by clever frame design in steel. See our Catalogue of the 'Crown' and other gang and sulky plows, —sent Free.

Cockshutt Gangs

The Maple Leaf

THIS Gang has an adjustable frame, and can handle loamy soil to 20 ins. wide by 8 ins. deep, or less. It meets the need of the man with 3 horses and a big farm to plow without help. The "Maple Leaf" handles a wide variation in soils, may be fitted with a straightener, and gets plowing done in the quickest time your farm soils allow. The adjustable frame gives you full advantage of every favorable acre of loamy land—yet meets clay, hard-baked or sticky soil by a narrower furrow.
