Ready Jan. 1st, 1903, a series of ten lessons on the Reading the Holy Scriptures and Liturgy.

These will include Analysis and Emphasis, the correction of common faults, and the general principles of the Church of England service. Each lesson contains an examination paper to be returned for criticism and remarks.

Series of fifteen lessons in unpointed Hebrew, by which a diligent student may rapidly acquire a working knowledge of the sacred tongue. Write for circulars to
DEAN PARTRIDGE,
Box 220, Fredericton, N B

OUR OFFER OF

HISTORICAL PICTURES.

We have much pleasure in offering to our numerous friends and subscribers an opportunity of obtaining, what are considered on all hands to be excellent pictures of the bishops, clergy and laity, who were members of the General Synod, held in Montreal, September, 1902. One represents the Bishops in their convocation robes, who formed the Upper House, the other the prominent clergy and influential laymen from all parts of the Dominion who formed the Lower House.

These pictures are large photographs, taken by the noted artists in Montreal, Messrs. Notman & Son, and make a picture suitably framed 18 by 14 inches. It is almost needless to say that such pictures, besides having great interest attached to them at the present time will be most highly prized in years to come.

We make this special offer: Subscribers to the Canadian Churchman, who pay up their subscriptions to the end of the year 1902, and also in advance for 1903, may have either of the pictures for one dollar. New subscribers paying one year in advance, can have the pictures on the same terms.

The price of each picture if sold alone is \$2.

Address, Canadian Churchman, 1 Toronto St., Toronto.

To Investors!

NEW YORK THOMAS MILLS

The Electrograph is a simple, practical machine for sending pictures, newspaper illustrations, maps, etc., by telegraph over the wires of any telegraph or telephone company.

THE ELECTROGRAPH COMPANY OF AMERICA

Controls all patents for Canada and the United States covering the Electrograph.

Capital \$1,000,000, \$10 Shares, Fully Paid Up and Non-Assessable.

No Bonded Debts. Now \$7.50 per Share.

The machine is simple and inexpensive to manufacture. The company is not selling, but leasing them. Those who invested in the Linotype have realized a gold mine. It is used in almost every newspaper and printing office. So will be the Electrograph in a few years. Besides, it will be used by the Secret Service, Police and Detective Departments of every city, and by banks for identification, by the War Department, and in other ways yet unthought of.

The telegraph and telephone are now indispensable. At the outset they were looked upon as little better than petty toys. People did not realize the possibilities; there was then no practical demand.

The Electrograph does not have to create a demand. The demand exists, newspapers have been for years waiting and watching for just such a machine. The Cleveland Plaindealer, the Pittsburg Dispatch, the Detroit Free Press, the Buffalo Courier and many papers of this class have rented machines.

The Scientific American, June 15, 1901, describes the Electrograph fully with cuts. It says "over a wire 770 miles from St. Louis to Cleveland, via Chicago, it worked faultlessly." The chief operator, Associated Press, Washington, D.C., says:—"I think in the Electrograph you have at last successfully solved the problem of transmitting pictures by wire by producing a machine of practical value and of extreme simplicity of operation.

The superintendent of wire service, Associated Press, New York City, says:—"A test on a wire running from this office to Philadelphia and back was satisfactory in every respect. Both the transmitter and receiver being placed in this office, I had every opportunity to see the working of both, and I can say that no test could have been more perfect or satisfactory." The company has dozens of other equally strong testimonials from leaders in all departments of Newspaper, Printing, Engraving, and Telegraph work. Mr. F. B. Squire, president of the company, spent six months investigating every phase of the practical working and possibilities of the Electrograph before investing in it. Mr. Squire is vice-president of the Standard Oil Company, was its original secretary, and has stayed with it ever since. In an interview published in the Cleveland Plain Dealer, July 9, 1902, Mr. Squire says that it is the expectation to instal at least 100 machines in one year; 200 machines will be soon in use, and fully 1,000 in a reasonable time, earning large dividends.

Every newspaper of consequence must instal an Electrograph or fall behind its rivals. Business will not depend on crops, or railway earnings, rains or frosts. Newspapers, banks, detective service, etc., go on forever. When many lines of investment are at high-water mark, it may not be amiss to put some profits into a new and promising business. Carnegie got his start when a telegraph operator by buying \$500 of telegraph stock. Those who saw the possibilities of the Telegraph, the Telephone, the Linotype, the Typewriter and other great inventions, won fortunes. So will those who invest in the Electrograph.

At the Toronto Exhibition the Electrograph attracted great attention. All who saw the pictures of King Edward, Sir John MacDonald and Premier Laurier were convinced of the practical working and the demand for this instrument.

OFFICERS AND DIRECTORS:
