

LOST!

THE TERRIBLE FATE OF A SMALL BODY OF MEN AND THE FUTURE HANGING OVER MANY OTHERS.

The keeper of the Eddystone light-house recently discovered a bottle containing the following pathetic sentences, the last expressions of a small band of ship-wrecked men:

"We have been living upon a raft for ten days and for more than half of the time without water. We have hoped against hope and now are ready and waiting for death. Anything is better than this agony. We cannot endure it more than a few hours longer. Yesterday we saw a vessel and thought we were safe but it passed on without seeing us. Today we have abandoned hope. Such a death, away from friends and in such agony, is terrible. To look into the cannon's mouth requires bravery but to face death coming slowly but surely needs only despair. There is no hope."

The only difference between the experience of these men and thousands of others on land to-day is that the shipwrecked men realized their fate while the others do not. They are in just as certain danger but are wholly unconscious of it. They are aware that their heads pain them frequently; that their appetite is fickle; that they are losing flesh or possibly bloating; that their skin is often hot or feverish alternating with distressing chills; that at times breathing is difficult; that the ambition is gone and despondency frequently occurs. People notice these things but think they are caused by some cold or indigestion, and hence give them no further thought. Any one of the above symptoms recurring at intervals indicates a diseased condition of the kidneys which is certain to result in Bright's disease if permitted to go on unchecked. What the terrors of this terrible disease are can never be described, but it has carried off some of the finest men and most notable women America has ever produced. "About one-third its victims," says Dr. Roberts, the highest authority on the subject, "through neglect to take the disease promptly in hand on its first appearance, die of uræmic poisoning (in convulsions or by diarrhoea). Many die from watery suffocation, from gangrenous erysipelas in the legs, thighs and genitals, pneumonia, heart disease, apoplexy, intestinal ulcerations, paralysis, etc., all of which troubles are the result of Bright's disease."

Another high authority says: "Diabetes and Bright's disease of the kidneys always terminate in death if discovered too late, but yield readily to treatment if taken in time. Thousands of people who pass thick, yellow matter with brick dust sediment and complain of a slight backache, headache, dizziness, imperfect vision, cold back, hands and feet, general debility, etc., etc., are victims of this deadly disease (unknown to themselves) and when, at last, overcome by its exhausting influence they present themselves to

their medical attendant he, nine times out of ten, will write out a prescription for malarial poison or, discovering their terrible condition, inform them that they have come too late."

To permit the kidneys to rot away or to suffer limestone deposits to accumulate in the bladder is criminal carelessness, especially when it can be entirely avoided by care and the use of the proper means. For this purpose, however, there is but one known remedy and that is Warner's Safe Cure, better known as Warner's Safe Kidney and Liver Cure. It is true there are many preparations that claim to cure or relieve these troubles, but no remedy has ever been found that absolutely does this except the one above mentioned. It is, actually, the only proprietary medicine which has ever received the unqualified endorsement of the medical profession. Among the number of physicians who have written at length regarding its wonderful properties, are the well-known Dr. Dio Lewis, Dr. Robert A. Gunn, president of the United States medical college of New York, and Dr. Frank Gallagher, of New Haven. These men are men of science and will not endorse anything they do not know to be valuable in the highest degree. But the thousands of men, women and children in every nook and corner of America, who have been kept from disease and saved from death by means of Warner's Safe Cure, speak more truly for its value than could all the endorsements of every physician in the land. They do not speak of its chemical ingredients, but of its healing power. They know the value of the remedy, for it has restored them to health. The above facts all show that it is an absolute duty you owe yourself and your friends to not only carefully observe and reflect upon these things, but to attend to them in time.
