

The Farmers' Market

WINNIPEG MARKET LETTER

Office of The Grain Growers' Grain Company Limited, April 2, 1917.

Wheat—The first market of last week started out strong, but there was a lot of selling on the advance, and later in the day more favorable reports from the north regarding the winter wheat crop pressed to the point. On Tuesday there was a lot of good buying in the local future, which closed higher than Monday's high point. This was the only day of the whole week when there was a lot of good buying. During the balance of the week the local market was slow and narrow and did not respond to the strength in the American markets. Chicago was the strongest market, influenced by the winter wheat reports, but toward the end of the week weakness in that market seemed to change somewhat. No doubt rains now would improve conditions greatly here, and the probability of a very early spring in the spring wheat areas and provinces is becoming a factor also.

Coarse Grains—Coarse grains have been steadily, with prices working higher, as the wheat prices have done.
