

BUCK SULLIVAN AFTER KETCHEL

Writes He is Trying to Arrange Match—Coming Down This Way

SENDS REGARDS

NEW YORK, Mar. 29.—The Sporting Editor of The Sun: Sir—Just a line to let you that I am here in New York after Jack Twinn's interest and \$100 posted to meet Ketchel or heavyweight in the country be the National Club. They are to get Jimmie Gardner to meet Jack and Ketchel will weigh in to a 2,000 house. Jack O'Brien a good bout for eight rounds, was knocked down twice in the 11th. It was O'Brien's best fight and it was a game battle against Ketchel.

MIKE "TWIN" SULLIVAN, Waterweight Champion

HE'LL PROFIT BY THE LAST RACE

Confident of Winning the \$10,000 Race on Saturday

TRAINING HARD

YORK, Mar. 31.—Tom Long's doing his work on upper avenue. Shrubb will take his last runs at Montclair, N. J. Shrubb thinks he will win the 1,000 race. He says he is in good shape. He has been in good shape for some time. He has been in good shape for some time. He has been in good shape for some time.

PHILADELPHIA

Philadelphia will have its first taste of the big league baseball at the part Friday afternoon when Athletics and Quakers meet in annual spring series to decide championship of the city. Games have been scheduled. It will be played at the Broad and Union grounds as the Athletics and Quakers meet. It will be played at the Broad and Union grounds as the Athletics and Quakers meet.

AGO, March 31.—Frank Gotch, an wrestler of the world, announced today that he had signed up to meet George Hackenschmidt, a champion of the Philles. Undoubtedly, the match will be harder fought than ever as each team is determined to win the good will of the fans from the

British Children

of children, aged from two to 10 years, for the Middlesex will be coming to Canada during the month of May. Parties desirable for either boys or girls is party should apply at once to FRANK A. GARDNER, Middlesex Home, Fairview Station, Halifax, N. S.

THREE YEARS IN KINGSTON FOR RAILWAY CONDUCTORS

Judge Winchester Hands Out Sentences to Five Prisoners Convicted of Having Conspired to Defraud the Grand Trunk—Vile Ontario Post Cards—C. P. R. Yardmaster Arrested for Forgery

TORONTO, March 29.—Sentences were imposed by Judge Winchester this morning in general sessions to five prisoners convicted of having conspired to defraud the Grand Trunk railway in connection with the issuance of bogus railway tickets. Daniel Corrigan, three years in the Kingston penitentiary. Frank McCallum, three years in the Kingston penitentiary. Harry Rosenber, one year in the central prison. Joseph Wood, one year in the central prison. Jacob Woods, suspended sentence.

obscure post cards and immoral literature was tried in the police court this morning and sentenced to twenty-three months in central prison by Magistrate Denison. Detectives Waldson and Sackett told of Groff's arrest and showed his possession of various cards and books that were in his possession. "He said he had just sold them and was waiting for the money," said the detective. The magistrate pronounced them the vilest he had ever seen. General Yardmaster Thos. Grimes of Toronto Junction was arrested by C. P. R. Constable Wright this afternoon on a charge of forgery and was allowed out on bail by Magistrate Ellis. It is alleged that Grimes, who draws pay checks has been stealing from the C. P. R. about \$300 on forged checks.

FACING BANKRUPTCY, ENGLAND MUST KEEP ON PILING UP ARMAMENTS

LONDON, March 29.—By a strict party vote of 353 to 185, the house of commons tonight refused to express lack of confidence in the government's naval policy. The motion on which today's notable debate hinged was proposed by Arthur Hamilton Lee, Conservative member of the house of commons. It set forth "that in the opinion of this house the declared policy of His Majesty's government respecting the immediate provision for battle-ships of the newest type does not sufficiently secure the safety of the Empire."

has no reference to our programme. Their idea is that if we build fifty Dreadnoughts, or a hundred, they would not build more than the number already decided upon and if we cease to build at all, we would not build one less. We have no difficulty in accepting that view without approach, and just as little difficulty in saying frankly that our view of our own naval needs is that our expenditure is and must be dependent upon German expenditure. It is essential that we keep our navy in a superior position. If I were asked to name the one thing which would most reassure us with regard to the prospects of peace it would be that the naval expenditure of Germany is being diminished and that ours is being augmented. Germany had given verbal, but explicit assurance, continued Sir Edward Grey, that she did not intend to accelerate her naval programme and would have only thirteen Dreadnoughts by the end of 1912. The British government has accepted these assurances, but was informed that four more would be built in the next six months, according to the German custom, especially of being put into commission. Moreover, changes in the European situation might lead to a change in the German programme. He did not believe in the British government ordering eight ships immediately, as they would not be completed any sooner than the four now ordered. Some time, he pointed out, Germany might change the type of her ships, which would necessitate a British change.

Find Out If You Have Catarrh

Don't Wait Till Consumption Develops, Cure Yourself Now

CATARROHOZONE In the discovery of this wonderful curative medicine the entire race is given freedom from Catarrh diseases, including Asthma, Bronchitis and Throat Weaknesses. Is Catarrh in your nose? Does it affect your hearing? Are your eyes watery? Is your breath offensive? These are the indications of Catarrh—now, why continue to live in misery when cure is guaranteed with Catarrhozone? So sure is Catarrhozone that thousands recommend it—tell of its wonderful merit after being cured themselves. Read this:

HOW CATARRHOZONE CURES. Miss Worsell is a resident of Clackville, Dea., and has been the means of pointing the way to health of many of her friends. "I received such extraordinary benefit that I have induced many of my friends to use it also. My catarrh was so bad a year ago that I despair of ever getting cured. I am sure my lungs were somewhat affected also. The relief I got from Catarrhozone is remarkable. I improved under this treatment very quickly, and was cured so thoroughly the disease has never returned."

Get the large dollar size of Catarrhozone; it contains a beautiful hard rubber inhaler and medicine that lasts three months. Smaller sizes, 25c, and 50c each. Beware of imitations—accept only "Catarrhozone." Sold by all reliable dealers or by mail from The Catarrhozone Company, Kingston, Ont.

The Germans," said the secretary, "new programme as one made for their own needs and one which

TO SEEK WEALTH IN EARTH DEPTHS

Proposal of Camille Flammarion Scientific and Mineral Discoveries of Great Importance Predicted

PARIS, March 29.—The European editor of the New York Herald prints the following letter from Camille Flammarion: In the Herald of December 30 last I brought up again the idea which I had expounded a long time ago, regarding digging a geothermic well to explore the internal constitution of the globe. Now that the antiference produced by the catastrophe at Mezin has calmed a little requests have come to me from many quarters to exactly describe my plans. With great pleasure I accede to these requests. Mezin has shown that it is not necessary to dig straight down from the earth's surface to find an economic and almost inexhaustible source of heat, to verify the rate of caloric increase, to find out the materials constituting the terrestrial globe are in a state of fusion—in a word, to do rationally and directly what has been done empirically and a little by chance up to the present time in miles.

Suppose that this work were undertaken, as the well must be very deep it must also be very wide, and I imagine that a circle of two hundred metres in diameter would be sufficient. When I speak of a well, I mean a hole thrown into the sea. However, this well must not be dug on the sea coast on account of the danger from immediate subsidence. It must be at a distance of several kilometres and approximately at the level of the sea. For this reason, Belgium, Holland or the French district of the Ardennes might be chosen. As for the debris it could be taken away by rail to the place destined for dumping it.

Admitting the cost of every one degree centigrade for every thirty-three metres of depth—we would find, doubtless, a temperature equal to that of boiling water at a depth of about three kilometres. That would be a wonderful source of heat which could be utilized on the spot or elsewhere.

But, for different reasons it would be interesting to descend further. First, the geothermic rate of old theories is today a moot question. Soundings in different districts have shown that it varies according to the nature of the ground. In one place the heat increases one degree centigrade for every thirty-three metres of depth, while in another fifty, sixty or even 120 metres are necessary to produce the increase. In other places, especially in the neighborhood of volcanoes, the thermometric rate increases in a descent of fifteen, or even ten metres. Thus, the temperature of boiling water would be met in some places at a depth of 3,000 metres, in others 10,000 metres. It would all depend on the kind of land where the experiment was made.

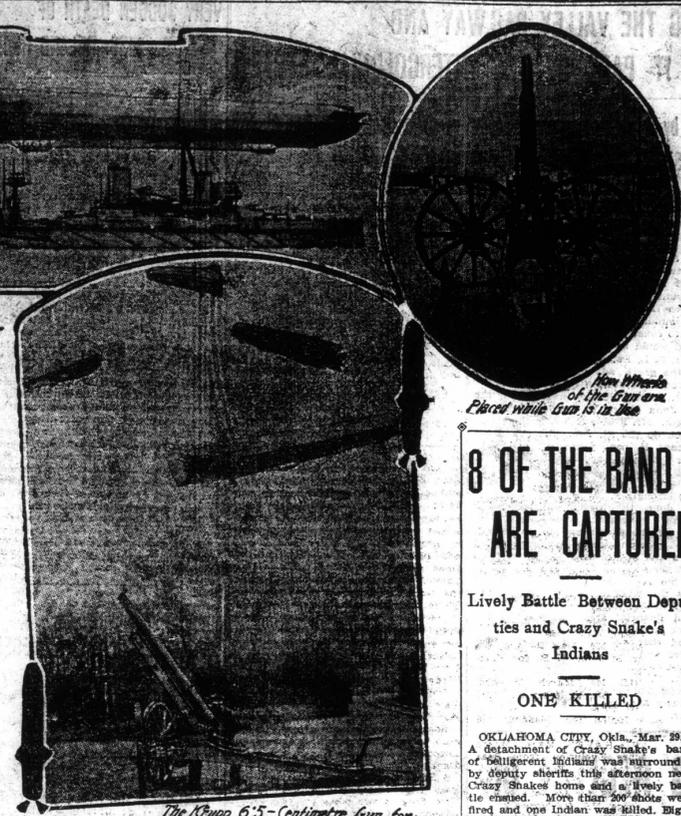

WOULD EMPLOY SOLDIERS TO DIG

The idea of digging a well to a depth of four, five or six kilometres or deeper appears, without doubt, a little foolish. What about the money for the realization of this foolish project? This prodigious undertaking should not be increased by even one cent the budget of the civilized countries which would take part in this work. Soldiers could be employed and a foreign legion of a new order could be established, whose mission it would be to explore the interior of the earth. Soldiers are fed, clothed and housed for exercise with the rifle and cannon. This would change the kind of exercise, that is all. Squads would be organized to dig and others to shovel out the earth. Other squads would be employed in taking away the debris, others in making and placing in position the immense iron armature of hoops to support the sides of the well and others would construct the necessary workshops and labor in the foundations.

A LONG STORY.

Assum—Say, old man, what did your wife say to you when you got in last night? Wounds—Then you won't have time to listen. I can't talk as fast as she did.—Houston Post.

LONDON, March 29.—The steamer Kaiserin Augusta Victoria, which arrived at Plymouth yesterday reports that owing to fog and heavy rain she was compelled to navigate by dead reckoning for 2,000 miles. The Edystone Lightship was the first thing she sighted since March 28.

PREPARING FOR ATTACK ON ARMED AIRSHIPS. No sooner had the airship become a factor to be reckoned with in warfare than the gunmakers set about the designing of a weapon by which dirigible balloons might be destroyed. Such a weapon is the Krupp 6.5-centimetre gun, here shown upon a field gun carriage, in such a way that the meter gun, here shown upon a field gun carriage, in such a way that the range-finder and the method of disposing of the wheels during the firing may be added. It has been argued that it is not easy to hit a dirigible balloon, nor is it; but, on the other hand, it must be remembered that such an airship as the Zeppelin offers a mark that is scarcely smaller in size than the Dreadnaught. For their gun, Messrs. Krupp have made a special burning shell, intended to pierce the envelope of the balloon and fire the gas. The ordinary projectile passes through the gas bag and does no more harm than make a couple of holes. The special shell can be used against aeroplanes, though in this case it does not fire, but acts as an ordinary projectile.

ISLAND HOUSE HAS BEEN IN SESSION TWO MONTHS

Government Thinks the Opposition is Too Windy—By-Election Soon to Fill the Vacancy Caused by the Death of the Speaker—Bill for the Destruction of Noxious Weeds

WHY DUNCAN DECLINED TO PUSH MATTER

FREDERICTON, N. B., Mar. 29.—Col. March, this afternoon dismissed the case against McKinnon. His honor admonished the young man for the part he had played in the affair. As a married man he should be heartily ashamed of himself, and his friends should be ashamed of him. They had no doubt, Justice, and girls perhaps one of whom might at some time come into the hands of men like themselves, and if they ever did it was likely that they would fare ill. He had no doubt in his mind that they came to the city for the express purpose of meeting these young ladies, and were bent upon this purpose. He had no sympathy whatever for them, and personally he would have liked to proceed with the case, and he would have treated them to the punishment to the full extent of the law, as this was one of the worst offenses punishable.

German Suffragettes Anxious to Hear Her on Women's Rights.

BERLIN, March 27.—Encouraged by the untimely death of the late Hon. Matthew Smith, the Speaker, a by-election will be held in the First District of Queens on July 7th, and on that account the opposition may make more strenuous efforts to obtain the seat. The government take the ground that they desire it for political purposes, in order to present a misleading report to the people. They state that last year they gave a report from September 30th to March 31st, and are willing to do the same this year, and in that way give the opposition a chance to make the comparisons they desire.

WOMEN WANT MRS. GATT.

German Suffragettes Anxious to Hear Her on Women's Rights. BERLIN, March 27.—Encouraged by the untimely death of the late Hon. Matthew Smith, the Speaker, a by-election will be held in the First District of Queens on July 7th, and on that account the opposition may make more strenuous efforts to obtain the seat. The government take the ground that they desire it for political purposes, in order to present a misleading report to the people. They state that last year they gave a report from September 30th to March 31st, and are willing to do the same this year, and in that way give the opposition a chance to make the comparisons they desire.

KING PETER MAY LEAVE

Duke of Teck and Prince Arthur of Connaught Also Named

BELGRADE, March 29.—Serbia has surrendered completely to the demands of Europe and the tension of six months over the Balkan situation, come to an end this afternoon. The King of Serbia probably will accept Balkan question at rest for many years. The ministers here of Great Britain, France, Russia and Italy will probably inform the Serbian government of their recognition of the annexation of Bosnia and Herzegovina by Austria-Hungary. They will advise Serbia to consider this question closed and issue a circular note to all powers, acknowledging this annexation and at the same time to Austria-Hungary of her possession of Bosnia and Herzegovina and revoking all claims to indemnifying concessions. Serbia undoubtedly will swallow this bitter medicine and follow the advice of the powers.

PREPARING TO LEAVE

LONDON, March 29.—Special dispatches received here from Rome and Vienna give rumors that Peter, the King of Serbia, and all the members of his family are preparing to leave Belgrade. The message from Rome says that King Victor Emmanuel has received a letter from Belgrade to this effect: "The King of Italy, according to this despatch, does not oppose the abdication of King Peter, but he will insist that Peter's son, Alexander, succeed him. The despatch from Vienna says that an influential party in the Serbian parliament is agitating against the Karagevich dynasty, the family of King Peter, and discussing either the Duke of Teck or Prince Arthur of Connaught as possible successor to the throne."

GRANK TRIES TO KILL ROOSEVELT

LONDON, March 30.—A dispatch to the Standard from Horta says that when the steamer arrived it was learned that an attempt had been made aboard to assault ex-President Roosevelt, but that it was frustrated and his would-be assailant placed in irons. NEW YORK, N. Y., March 29.—Giuseppe Tozzi, a steamer passenger on the Hamburg, is the man who threatened ex-President Roosevelt, according to a dispatch from Horta to the World. The incident happened soon after the Hamburg was leaving sight of America. Then Tozzi rose from his companions to the upper deck and started for the upper deck where Mr. Roosevelt was standing with his wife. "He has let them take away my child," Tozzi is said to have shouted in the ship. "Now he shall pay for it." Tozzi's wife, Mrs. Tozzi, quickly restrained him, carried him below, and by the captain's orders, put him in irons. The incident, it is said, is only known to Mr. Roosevelt and a few of his companions. Tozzi refused to answer any questions. "Roosevelt is trying to poison me," the ship's doctor said, "now taste all food offered to Tozzi before he will eat it."

WEAK MAN RECEIPT FREE

Any man who suffers with nervous debility, weak back, falling memory or deficient manhood, brought on by excess or dissipation, may cure himself at home with a simple prescription that will gladly send free, in a plain sealed envelope, to any man who will write for it, to Dr. Robinson, 307 West 12th St., Detroit, Michigan.

THE RETURN OF PROSPERITY

means openings for a large number of young men and women. Prepare yourself by taking a course at the Fredericton Business College. Open all the year round. You may enter at any time. Send for free catalogue. Address: W. J. OSBORNE, FREDERICTON, N. B.

SOME MORE REASONS FOR OUR SUCCESS

Our long experience has taught us just what the public needs. Our course of training is kept up-to-date, and meets first these needs. Our graduates' good work has been our best advertisement. This public has confidence in our statements. Catalogue to any address. S. Kerr
