At present the the two per cent mineral tax. I am In the Coupling of the second stateAt present the the two per cent mineral tax. I am not without hope that such an effort not without hope that such an effort would meet with success; at any rate, it is worth trying for. Mining men do not, if I understand aright, wish to avoid a fair share of taxation, nor use they doing so. The last public returns of the minister of finance show that about 33 per cent of the total revenues of British Columbia are derived from the mine, and a large hoist is about to be mining districts of the interior."202

Asked by The Miner representative could not say very much about it, but if there was anything to be said with regard to the Le Roi, Mr. McMillan connected with the management of regard to the Le Roi, Mr. McMillan said that he had but little to say in ad-dition to what is generally known. The Le Roi, as the public reports show, has been doing very well this summer, and under the management of Mr. Mc-kenzie the costs of mining and smelt-ing are being materially reduced. The reduction in the costs of mining and smelling mean much for the Rossland sistrict, and there is reason to believe the district, which, two or three years since were not considered to be of com- ish Columbia again next year.

There is a brand new story in connec-tion with the old smelter at Pilot Bay. The latest is that the plant will be util-ized, together with the Kaslo sampling works for the preliminary treatment of Slocan zinc ores prior to their shipment works for the preliminary treatment of Slocan zinc ores prior to their shipment to Kansas for final reduction. Thomas Jones, representing zinc smelt-ing interests at Iola, Kansas, has just completed an inspection of the works in company with A. H. Buchanan, man-ager of the Bank of Montreal at Nelson, the property having belonged to the bank since the original company went into liquidation. A railroad rate of \$11 per ton has been secured on Slocan zinc ores consigned to Kansas smelters, and the rate is regarded as extremely rea-sonable in view of the fact that the ore tas to be hauled almost across the United States from north to south, and that the product will require to be handled by two independent roads after delivery at St. Paul. The preliminary process in-tended to be carried on at Kaslo and Slocan zinc ores prior to their shipment as

strike, which promises to be of no little importance to the camp generally. The statement is made that the Giant com-pany will immediately proceed to place their workings in shape to utilize the new discovery to the best advantage and the increased stoping ground ren-dered available by the fact that the vein has picked up at this level will growth make the state of the state will state of the state of t which the previous high grade ore had proved decidedly remunerative to the and the inc been extracted and where a fault oc-curred in the vein a crosscut run for five cars of the high grade ore extract- vein has p greatly enlarge the company's operations in respect to shipments. The work has been under way for

everal months, and it is an interesting feature of the strike that it was made within 24 hours, or almost so, of the time predicted for weeks ahead. The time predicted for weeks ahead. The announcement was made to The Miner and the public generally who enquired that the ledge would be encountered in the lower workings about the end of October. The facts have borne out the prediction in the most gratifying man-ner. One important aspect of the strike on the Giant, should it prove as satisfac-tory as indications would seem to de-note, is the effect which extensive and giant will have on the future of sur-rounding properties. Various proper-ties in the immediate vicinity of the

Giant will have on the future of sur-rounding properties. Various proper-ties in the immediate vicinity of the Giant are more than likely to be stimu-lated into action, and the general result in promoting the prosperity of the camp can scarcely be overestimated at this juncture. It is sincerely to be hoped from every point of view that the Giant strike will prove satisfactory. BOSTON, Mass., Nov. 4 .- The result | the other candidate for the office, rethe Boot and Shoe Workers' Union, of the general executive board for a which has local branches spread over term of two years: G.
