

## MOVEMENTS OF AIR VESSELS.

**Six Hours Trip in Air Ship Pom  
morn From New York to  
to Philadelphia.**

### OWNER'S WIFE ABOARD.

**Military Air Craft Will be Feature  
of Next Great  
War.**

**ARRIVED.**  
At New York—The Pommern Capt. Oscar Erbsloeh, with five first class passengers from Philadelphia. **PHILADELPHIA Monday**—At last it has come to pass that the movements of air craft must be published as well as the news of ocean vessels. This was demonstrated yesterday by Dr. Julian P. Thomas, who made an ascension from Point Breeze grounds at 11 o'clock yesterday morning in his recently purchased balloon, the champion Pommern, landing in New York six hours later.

Before making the start Dr. Thomas announced that he was bound home, and, true enough, shortly after 5 o'clock the Pommern was landed at 175th street and Westchester avenue within rifle shot of the Thomas home. The craft was commanded by Oscar Erbsloeh, the German who won the J. Gordon Bennett cup in the recent international race from St. Louis. Capt. T. T. Lovelace, of New York, engineer of the Aero Club of America, was first mate.

#### One Woman Passenger.

The owner's wife Mrs. Thomas, was the only woman passenger aboard, and within an hour after the Pommern sighted port she was safely back in her apartments at 110th street and Riverside drive. The other passengers aboard were Lieutenant Robert Henderson, U. S. N., chief engineer of the battleship Missouri, who was making observations on the use of balloons as accessories to war vessels, and Rudolph Erbsloeh, uncle of the champion balloonist.

The Pommern left the Point Breeze grounds at 11 o'clock, with the six ballonists and carrying nearly half a ton of sand ballast. Before it was let go, Dr. Thomas assured some of his friends that he was making for New York and home.

As the balloon left the ground it sailed west of north, and it looked as though it was destined to miss reaching port until it had reached the central part of the city. As far as Chestnut street the balloon kept on a course which would have taken it in the direction of Buffalo traveling at an altitude of about 1000 feet.

Ballast was thrown overboard under orders of Captain Erbsloeh and the air craft sought a more favorable wind.

#### Heads for New York.

At an altitude of nearly 2000 feet new observations were taken, and the Pommern was headed for New York, travelling before a 15-knot wind. Mount Holly, N. J., was sighted at 12.55 off the starboard bow, and 15 minutes later had almost disappeared astern.

At 4.55 o'clock the skyship was sighted from the Battery, New York, as it hove in sight over Governor's Island.

After passing over the fort at Governor's Island, the balloon held to a course up the East river, passing directly over the Brooklyn bridge.

One of the bridge cops, who is stationed at the middle span, picked up a newspaper which blew against his legs shortly after 5 o'clock and read about the start of the Pommern. A moment after he had read the item he was besieged with questions about the balloon, then overhead, and was able to tell people all about it.

#### Land Near Home.

After crossing over the bridge the Pommern held to a course along the Long Island shore, and about 6 o'clock Dr. Thomas' party effected a landing at 175th street and Westchester ave. in the Bronx.

Dr. Thomas said: "I had studied the methods of the French, having been the first man from this country to make an ascension with Count de la Vaux, and the American methods, as shown by Roy Knabenshue, whom I consider to be the best in this country, and I want-

ed to see what the Germans could do. "I closed with the Germans for the purchase of the Pommern today, and it is interesting to note, as giving the viewpoint of men who go up in the air while they didn't doubt my ability to pay, they wished to receive all of the money before I made the ascension, thinking it easier perhaps to settle with me than with my heirs.

"We started at 11 o'clock in the gas works at Point Breeze. The balloon was equipped with 23 bags of ballast, weighing 60 pounds each. The six passengers weighed about 1000 pounds. I announced before I started that I would go to New York but the balloon was managed by Herr Erbsloeh, and the credit of the remarkable trip should be given to German methods.

"When we ascended at Point Breeze the current took us directly over Philadelphia. We passed directly above William Penn's monument and in fact almost touched it. It was about 1000 feet up to clear air above the smoke and dust and we took the altitude at first. The highest point we reached was about 4000 feet. Above 1000 feet the air current set toward the north-east. Below that the wind blew toward the north.

"In our flight we paralleled the Pennsylvania railroad nearly all of the way. We could have landed in New Jersey as we found ourselves approaching the sea, but I had said New York, and I was willing to chance something to reach it, and Mrs. Thomas backed me up.

"For a short time I was in doubt as to our exact position, but I recognized the town of Matteawan, in New Jersey, and knew that we were keeping pretty close to our course.

#### Nerve is Required.

"When we sighted the ocean it took nerve to decide to go on. 99 out of a 100 aeronauts would have landed at once. However we had plenty of ballast left, and after some searching found a wind that should drift us toward New York. When we passed over the forts we were able to count ten batteries where I understand but one is visible from the water.

"We were able to take pictures of the batteries at both Forts Hamilton and Wadsworth, but those pictures will never be made public, as I understand it is contrary to law. We could easily have dropped missiles on Fort Hamilton. At that time we were about 3000 feet in the air. The soldiers saw us, and we were saluted by a bugle call.

"At first I planned to land at the Battery, but Broadway was just lighting up and we could not resist the temptation, hungry as we were, to fly over the city and see the lights. Coming across the bay we raced with a steamship, I think one of the Old Dominion liners and as the wind was fresh at that time we beat her easily.

#### Passes Over Astoria.

"As we went on we passed over Astoria and I thought I would land there at the gas works, tie up for the night and start on another trip tomorrow, but Erbsloeh did not understand my orders, and when he did understand, the space between land and water was too short to permit of a landing. After that we blew on into Westchester, and when we came to a good landing place we asked some boys to catch our rope. This landing was without incident."

Probably long before The Hague conference has patched up the dove of peace we shall see a squadron of armor-plated airships alighting on the Sugar Loaf mountain. The interest the U. S. government has taken in the Thomas dirigible balloon, which sailed up to New York from Philadelphia Tuesday and the prominent part played by army officers a few weeks ago in the thrilling race from St. Louis to the sea, foreshadows the formation of a flying squadron carrying the Stars and Stripes. France, Italy, Austria, England and Germany have all gone in enthusiastically for military aeronautics, and the war sharpens already discussing the probable tactics that the fighters among the clouds will employ in the event of another European conflict. The war balloon made its appearance during the Franco-Prussian struggle in 1870-71 and it did good service while the famous siege of Paris was on. During the war between Japan and Russia it did more or less effectively much of the work once done by cavalry scouts. But now the question is whether it cannot do much more. La Patrie, the dirigible airship that sailed around the Eiffel Tower a few months ago, is built to fight as well as fly. The under side of the balloon is sheathed with armor plate tough enough to resist rifle bullets. Besides a crew of four men, the ship can lift a ton of dead weight to a height of 1000 feet—where it would be safe from artillery fire—and stay up for two hours; and may not the dead weight consist of explosives to be dropped upon a city or within the enemy's lines? But it takes two to make a fight, and hence we have the prospect of battles in the air. The submarine—the fearful mite that can rise unseen from its element and wreck the biggest battleship afloat—this and the aerial cruiser may play a big part in the wars to come.

#### A HAPPY ENDING.

Visitor—So your poor husband has passed away, Mrs. Murphy. He died happy, I hope?

Mrs. Murphy—Oh think so, mum. The last thing he did was to crack me over the head with a medicine bottle!

There is some satisfaction in knowing that Mr. Aylesworth's successor is as eminent as a French Canadian barrister as Mr. Aylesworth is as an English Canadian barrister.

## NOVA SCOTIANS WERE ASLEEP.

**Till Mrs. Clara May Coleman of  
New York woke them  
up.**

### SO SAYS BOSTON JOURNAL

**The Advises the Young Man  
(With Money) to go  
West.**

**BOSTON, Monday**—Of the thousands who viewed with interest and surprise the exhibit showing the resources and wealth of Nova Scotia at the Jamestown Exposition, valued at millions of dollars and guarded strangely enough by two sentinels in Confederate uniforms, there were few, indeed, who saw in it a monument to what a woman can do and the power she can exert over a government, almost against its will, toward the advancement of its own interests.

Yet Governor Duncan Howard Fraser of the Province of Nova Scotia before a record-breaking audience on Nova Scotia day at Jamestown so declared it to be. But for a woman who at the sacrifice of considerable comfort traveled 1500 miles to place before the premier of the provincial government in a new light what the government was losing in refusing the invitation of the management of the exposition to send an exhibit, it would never have been sent.

#### Second Richest Woman.

That woman was Mrs. Clara May Coleman. That she is the second richest woman in the world is noteworthy. That she, taking the wealth that she inherited from Hugh Irwin, banker, partner of Peter Cooper, and contemporary and bosom friend of Washington Irving, and increased it along conservative lines in a manner that has won her the admiration and respect of capitalist which is still more noteworthy. That she, going to Nova Scotia for her health, has done more for that country than any other human being in romance and history combined.

With charming courtesy Mrs. Coleman, who is stopping at the Parker House en route to Nova Scotia, last night received a Journal reporter, her hobby is Nova Scotia and it was to that country that the talk gradually drifted.

#### Country Was Asleep.

Nova Scotia, as Mrs. Coleman found it, was a country of great natural resources, mineral, water and timber. She has always been of the type of financier that builds rather than destroys, and upon her recovery she, accompanied by experts, went to the territory, until there is hardly an inch left that she has not personally studied. The people, she found, were secretive and disbelievers. It was a country asleep, and to herself she set the task of awakening it. American capital was needed and American capital she provided.

English capital she has no faith in. They work along on conservative lines, and if a man is worth \$10,000 they won't believe it, she declares, and to this and the native secretiveness and distrust of outside influences she attributes Nova Scotia's long period of non-development. With the invasion of American capital she declares the situation is now changed so much so that for the timeworn axiom of Horace Greeley she substitutes: "Go East, young man."

Mrs. Coleman makes her home in New York, where she has apartments at the Waldorf. She is, however, an extensive traveler, making in addition to several trips to Nova Scotia every year journeys to various fields which are being or about to be exploited. She was one of the first to pass judgment on the Cobalt properties, and her judgment has been sustained by subsequent developments. Personally she differs widely from other women who are figures in the world of finance, being retiring and extremely modest.

#### HOW'S THIS?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.  
We the undersigned have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by him.

WALDO L. KINMAN & MARVIN, Wholesale Druggists Toledo, O.  
Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system. Testimonials sent free. Price 75 cents per bottle. Sold by all Druggists.

Take Hall's Family Pills for constipation.

**KINGSTON, Wednesday**—The Irish Catholic organ the Canadian Freeman is calling for the selection of Charles Murphy of Ottawa as cabinet minister in the federal cabinet as the representative of the Irish Catholics. The paper says the Irish Catholics have been loyal to liberalism even while they have received too little attention at the hands of the party. The selection of Mr. Murphy would be worthy of the great leader and a fitting recognition of the Irish Catholics loyalty.

#### THE CAUSE OF IT ALL.

Judge—Why are you here, sir?  
Prisoner—For givin' a correct imitation of a policeman.  
Judge—In what manner?  
Prisoner—I took two bananas from a fruit stand.

## JAIL RATHER THAN RELATIVES.

**CHICAGO, Wednesday**—Miss Rose Haines, who spent a fortune on the open Board of Trade, expressed a desire yesterday to remain in the woman's quarters of the city jail rather than be released on parole to a relative living in Wisconsin. "Can't I go back to jail?" she asked after she had pleaded guilty to two charges of grand larceny and Judge Gibbons had ordered her paroled. "I have made a good many friends there and can have a pretty good time. It is really a pleasant, homelike place. My people wouldn't even bring me a clean shirtwaist while I was in jail."

It was explained that she could go back by withdrawing her plea of guilty. She did not return to the jail during the afternoon.

Miss Haines is 35 years old. She inherited \$40,000, which she lost in speculation. She was arrested for stealing diamonds. She has been in jail two months, her relatives refusing to obtain bonds for her.

### MEN BEING LAID OFF.

**TORONTO, Wednesday**—The Toronto Star today says correspondents in different parts of Canada have sent despatches indicating the state of industry in their districts. The report indicates general prosperity but also a feeling that caution should be shown lest the remarkable activity of the last year be followed by a period of comparative darkness. A number of places report a policy of retrenchment affecting employees some of whom have been paid off and others put on shorter hours. Brief summary is as follows, Ottawa, several thousand laborers on railway construction in Canada will be laid off for the winter, but hundreds will find work in lumber camps. A quieter period everywhere is possible but hard times not expected. Montreal, 700 men discharged. London, probably 100 laid off and working hours reduced. Stratford 200 men dropped, Sydney, everybody kept working. Halifax full staff retained. Walkerville, some firms running light. Windsor all men working. St. John, factories busy. Guelph, some curtailment. Hamilton, most plants working full. Winnipeg, northwest is bustling. Phoenix, B. C., 200 men laid off. Omen Sound, factories working overtime.

### GERMANY FOR PEACE.

**LONDON, Wednesday**—In the course of his reply to the address of welcome presented him at the guild hall this morning, Emperor William spoke of his previous reception at the guild hall in 1891 and emphasized his unalterable desire to foster the peace of the world. "I said then on this spot that my aim is above all the maintenance of peace. History, I venture to hope, will do me justice in that I have pursued this aim unwaveringly ever since. The main prop and base for the peace of the world is the maintenance of the good relations between our two countries and I am further strengthened them so far as lies in my power. If the German nation wishes to coincide with mine. The future will show a bright prospect."

When the Stomach, Heart, or Kidney nerves get weak, then these organs always fail. Don't drug the Stomach, nor stimulate the Heart and Kidneys. That is simply a makeshift. Get a prescription known to Druggists everywhere as Dr. Shoop's Restorative. The Restorative is prepared expressly for these weak inside nerves. Strengthen these nerves, build them up with Dr. Shoop's Restorative—tablets or liquid—and see how quickly help will come. Free sample sent on request by Dr. Shoop, Racine, Wis. Your health is surely worth this simple test. For sale by THOS. J. DURICK.

Inspector Duncan Noble is determined to stamp out rowdiness on the I. C. R. trains. On Saturday accompanied by Constable Garon of Rimouski he arrested Alfred Levesque, sixteen miles back of Amqui on a charge of creating a disturbance on the trains. Levesque was taken before a magistrate at Rimouski and fined \$21. Inspector Noble and Constable Garon arrested on the same day at Kempt, Phillip Medeau on a similar charge. Medeau was fined \$17.

Mr. Noble who returned to Campbellton Saturday night told a reporter for the Graphic that the farmers of the Matapedia valley were still digging potatoes. He added that there was an abundance of grain yet to be taken in.

A tickling cough, from any cause, is quickly stopped by Dr. Shoop's Cough Cure. And it is so thoroughly harmless and safe, that Dr. Shoop tells mothers everywhere to give it without hesitation even to very young babies. The wholesome green leaves and tender stems of a lung-healing mountainous shrub, furnish the curative properties to Dr. Shoop's Cough Cure. It takes the cough, and breaks the sore and sensitive bronchial membranes. No opium, no chloroform, nothing harsh used to injure or suppress. Simply a delicious plant extract, that helps to loosen the lungs. The Spaniards call this shrub which the Doctor uses, "The Sacred Herb." Demand Dr. Shoop's. Take no other. For sale by THOS. J. DURICK.

## A TRAINED NURSE

**After Years of Experience, Advises Women in  
Regard to Their Health.**

Mrs. Martha Pohlman of 55, Chester Avenue, Newark, N. J., who is a graduate Nurse from the Blockley Training School at Philadelphia, and for six years Chief Clinic Nurse at the Philadelphia Hospital, writes the letter printed below. She has the advantage of personal experience, besides her professional education and what she has to say may be absolutely relied upon. Many other women are afflicted as she was. They can regain health in the same way. It is prudent to heed such advice from such a source.

Mrs. Pohlman writes: "I am firmly persuaded, after eight years of experience with Lydia E. Pinkham's Vegetable Compound, that it is the safest and best medicine for any suffering woman to use."

"Immediately after my marriage I found that my health began to fail me. I became weak and pale, with severe bearing-down pains, fearful backaches and frequent dizzy spells. The doctors prescribed for me, yet I did not improve. I would blot after eating and frequently become nauseated.

"I had pains down through my limbs so I could hardly walk. It was as bad a case of female trouble as I have ever known. Lydia E. Pinkham's Vegetable Compound, however, cured me within four months. Since that time I have had occasion to recommend it to a number of patients suffering from all forms of female difficulties, and I find that while it is considered unprofessional to recommend a patent medicine, I can honestly recommend Lydia E. Pinkham's Vegetable Compound for I have found that it cures female ills where all other medicine fails. It is a grand medicine for sick women."

Money cannot buy such testimony as this—merit alone can produce such results, and the ablest specialists now agree that Lydia E. Pinkham's Vegetable Compound is the most universally successful remedy for all female diseases known to medicine.

When women are troubled with irregular, suppressed or painful periods, weakness, displacement or ulceration of the female organs, that bearing-down feeling, inflammation, backache, bloating (or flatulence), general debility, indigestion, and nervous prostration, or are beset with such symptoms as dizziness, faintness, lassitude, excitability, irritability, and all such troubles.

No other female medicine in the world has received such widespread and unqualified endorsement.

The needless suffering of women from diseases peculiar to their sex is terrible to see. The money which they pay to doctors who do not help them is an enormous waste. The pain is cured and the money is saved by Lydia E. Pinkham's Vegetable Compound.

It is well for women who are ill to write Mrs. Pinkham, Lynn, Mass., The present Mrs. Pinkham is the daughter-in-law of Lydia E. Pinkham, her assistant for many years before her decease, and for twenty-five years since her advice has been freely given to sick women. In her great experience, which covers many years, she has probably had to deal with dozens of cases just like yours. Her advice is strictly confidential.

Lydia E. Pinkham's Vegetable Compound Succeeds where Others Fail.

### LADIES' STORE.

Our new fall goods are now in stock, consisting of supplies for Ladies, Misses, Children and Infants.

Stamped Liners for Waists, Cushions, Photo-frames and Centres, with materials for working always on hand.

Mrs. S. McLEOD.

### All Kinds of Job Work Neatly Executed.

Emperor William, whose testimony is sought by both sides in the Harden libel suit.

## Weak Women

To weak and ailing women, there is at least one way to help. But with that way, two treatments must be combined. One is local, one is constitutional, but both are imperative, both essential. Dr. Shoop's Night Cure is the local. Dr. Shoop's Restorative, the Constitutional.

The former—Dr. Shoop's Night Cure—is a topical mucous membrane suppository remedy, while Dr. Shoop's Restorative is wholly an internal treatment. The Restorative reaches throughout the entire system, seeking the repair of all nerve, all tissue, and all blood elements.

The "Night Cure", as its name implies, does its work while you sleep. It soothes sore and inflamed mucous surfaces, breaks local weaknesses and discharges, while the Restorative, taken before retiring, gives renewed vigor and ambition, builds up wasted tissues, bringing about renewed strength, vigor, and energy. Take Dr. Shoop's Restorative—tablets or liquid—use a general tonic to the system. For positive local help, use as well
