With careful investors, safety of income and principal is the first requirement.

¶ For institutions, partnerships, business men and investors generally, investments should be readily marketable, and also readily acceptable as collateral.

¶ One of the types of issues which best fulfills these requirements is usually the short term bond or note. Early maturity adds stability to its market course and the issue is paid at par, and in some instances at a premium, within a few years or less. Among business men and institutional investors who may desire to sell these investments at almost any time, there is a strong preference for short term issues. Let us furnish our proposals. We will do so on request.
