LIFE CHIPS

LIFE CHIPS has traveled a long way in public favor. When first put on the market it was recommended especially as a warm-weather food, but many who have benefited from the use of this, the most wholesome of all cereal foods, refuse to return to the old-fashioned, partially-cooked breakfast porridges. When you eat

Life Chips

you please the palate and do not impair the digestion.

YOU SHOULD HAVE A GOOD WATCH

It is not worth your while to have a watch that does not keep good time, when you can get a first-class timekeeper at such low prices. Note the prices that we can sell reliable watches at:

A., of London, and Miss Willis, sister of the groom, was the bridesmaid. The wedding was a very charmingly rendered by Miss Westervelt. After a honeymoon trip east, Mr. Willis will return to his home in London. The bride was a member of the staff of James Wright & Co., and among the many beautiful gifts received were a check.

LIKE A FLASH Came a Hard Knock From Coffee.

It's a simple matter to satisfy sensible, thinking people by "ton days' trial" of Postum. It is a fact that if it is coffee causes the illness, an almost immediate change takes place. The old coffee ails, slushiness, British somnia, sallow skin, headaches and all the other, whatsoever form the nerves decide upon when they are thrown out of balance by coffee, begin to leave, and it's only a question of a short time when Postum will end them all and bring back health.

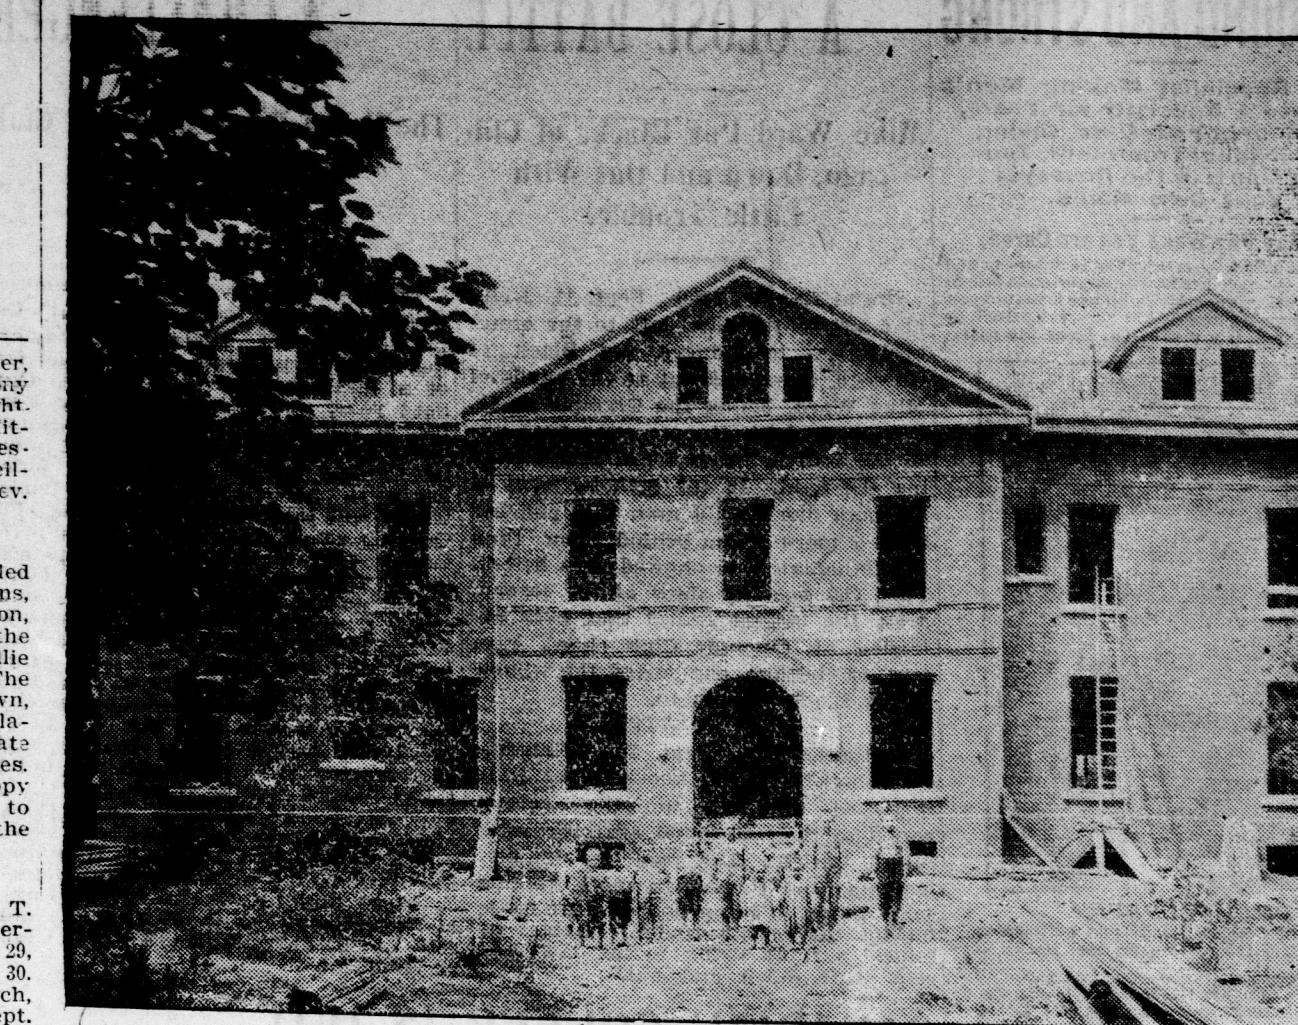

I had drunk coffee every morning in and out of season for two years ago, when all of a sudden my stomach rebelled, and shortly thereafter I became a nervous wreck, couldn't eat a bite without intense suffering. I lost most all my flesh and was practically starving, because couldn't get any good out of what little food I did eat.

"One morning when in this wretched, run-down condition I read a magazine article about Postum Food Coffee, and the case seemed so much like mine I sent out and got a package. At that time almost nothing would stay on my stomach, but the first cup of Postum was made for me seemed to warm and nourish me clear to my fingertips, and this delightful glow of well-being feeling continued until the first five or six days the Postum was all I could keep on my stomach, or even take a little without great suffering, but I got better so fast I added other foods gradually and kept gaining strength and flesh, until now I am a hearty man and really enjoy life once more. I know it was Postum that saved me from starving to death when my stomach had been ruined by coffee.

I know lots of folks don't make Postum right, but it takes only five minutes to boiling to make it perfect according to the directions. Then it's as good as the best coffee." Name given by Postum Company, Battle Creek, Mich.

Ten days' trial of Postum proves whether or not it's the coffee hurts you. Get the little book "The Road to Well-being" in each package.

The Thomas Alway Hall Home for Children.

Before the winter arrives another handsome structure will be added to London's institutions of charity. The Thomas Alway Hall Home for Children, which is now under construction, will be a valuable addition to the public buildings of the city.

It will be remembered that some time ago a bequest was made for a Home for Children, the donor of the money being the late Thomas Alway Hall, who bequeathed \$10,000 for the purpose, and the money was handed over to the Children's Aid Society by the executors.

At present, the children who are in the Home are housed in the old building on the Wharfside road, which, while its situation was as good as could be wished, was in too dilapidated a state for much longer service.

The bequest was therefore a very opportune. Now there has arisen in front of the old building a new structure, which will be the pride of the city. As will be seen from the accompanying cut the building is plain in its architecture, but quite ornamental enough. It is a two story structure and is attached to the old building. The present premises will also be utilized, and several of the smaller rooms will be used as store rooms and perhaps sewing rooms.

As the building is constructed of red pressed brick the appearance is very fine, with its stone foundation and the fine structure stands out prominently in front of the old building, which is back among the trees on Wharfside road, inside there will be a neat corridor and on the ground floor about eight rooms. These will be reception rooms and board rooms and also the apartments of the matron and her assistants. At present the work has not

been progressed to start the plastering, but this will be done by the month. The floors are to be finished in hardwood and the inside trimmings will be as good as could be wished by the maker of the bequest.

The upstairs department will be divided into two large dormitories with two lavatories, one for boys and one for girls. These dormitories will be of a more sanitary nature than the present ones in use and will be most comfortable. The little ones will have nice single beds, each room accommodating probably twelve or fifteen. At present the matron, Miss Turnbull, has fifteen children in the home, but there is no doubt that the needs for more accommodation were pressing. Now that need is shortly to be relieved.
