He will tell you what Gin Pills die for him, after he had suffered with Kidney trouble for 15 years. Here is his letter: his letter:

"I suffered for about 15 years with
my Kidneys. I could get nothing to
help me. The pain went all through
my back and shoulders and down
the calves of my legs. When I would
sit down for a while, I could not
straighten up again until I would
walk a rod or more, the pain was so
great. Aneighbor advised me to take
GIN PILLS. I didso and six boxes
cured me. It is about two and a half
years since I quit taking them. My
back is all right; no pains and no
more backache. I thank GIN PILLS
for it all—they are worth their weight

Get a Move on

These are the days when the lie abeds are getting the axe. In good times one is prepared to offer excuses for laziness, but to-day the least a fellow can do to hold down his job is to make a show of bustle. John D. Rockefeller was asked one evening by his eldest son, then at school, who was studying Shakespeare, what the expression meant, "There is a tide in the affairs of men which, taken at the flood, leads to fortune." "What tide, father?" asked the youth. "Tied-to-business," replied the financier without looking up from the papers he was studying. Get the right start and the race will come out all right. No man fond of his bed has ever set anything going. "How long will thou sleep, O Sluggard," should be megaphoned into your ear if you are inclined these days to take things easy in the morning. "Your King and country need" "Your King and country need" if we can induce you to try a bottle of vinol, our delicious cod liver and iron tonic without oil. to make a show of hustle. John D.

Your King and country need at home as well as in the trenches, and the laggard in business just now is just as much a traitor as the fellow who dodges the call to

Dr. Boyd's Experiment

It Prevented a Rupture Between Man and Wife

By DWIGHT NORWOOD

"Doctor, I wish to consult you about my wife. She has acted strangely ever since our child was born." The words were spoken by Stephen Hapgood, and he was addressing Dr. Howard Boyd.

"Be seated, Mr. Hapgood, and give your wife's symptoms. We have a great many cases of women acting strangely after child birth. What form does it take in Mrs. Hapgood's

"An antagonism to me. It was a love match between us, and we have been devoted to each other ever since our marriage until this strange freak came upon her. She has taken it into her head that I am ill treating her. I am fearful lest at any day she may apply for a divorce."

"Um!" said the doctor thoughtfully. "Will you visit her?" asked Mr.

"Does she consider herself ill?" "Not in the least. She supposes herself to be in the best of health.' "In that case what reason shall I give for my visit?"

Mr. Hapgood was unable to suggest reason, and Dr. Boyd continued: would like to try in this case what I admit is an experiment. Suppose we give your wife a shock?"
"What kind of a shock?"

"It might be reported to her that you had met with an accident, had deserted her for another woman or had been killed."

"I see," replied Mr. Hapgood, musing. Then he replied: "To impose on her by pretending to be injured would not work. If I should pretend to desert her she would surely get a divorce. The only one of the ways you have mentioned of shocking her that seems to me to be practicable is for me to pretend to be dead. And even that would be difficult." "Try it."

"But suppose the shock should injure my wife physically still further?" "If she is not in her right mind the announcement will not affect her uness to restore her reason. If it has

this effect we can disabuse her at "Very well, doctor; on your respon

sibility I will make the trial," and Mr. Hapgood left the doctor's office. While this dialogue was going on another was taking place between Mrs.

Hapgood and an attorney. 'Mr. Stanley," she said, "I desire that you procure a divorce for me from my husband." "On what grounds, madam?"

"Cruelty." The attorney took a pen and propounded a series of questions as to Mr. Hapgood's cruel acts. When the catalogue was finished, he drew up a legal document which he presented to her for signature. She put her name to it without a quiver and, returning to her home, met her husband the same evening at dinner with a cold stare.

Fortune favored the plan for shocking Mrs. Hangood. Not long after her

T. B. Taylor & Sous, Druggists, Watford.

h his office he heard a newsboy crying "Extra! Big railroad accident!" and buying the paper he discovered that the trouble had occurred on the road by which he was accustomed to go to his suburban home. Stepping to a telephone, he called up Dr. Boyd, and the result of the interview was that the doctor went to the Hapgood home and announced to Mrs. Hapgood that her husband had been reported badly injured on his way home from the city.

The doctor's eyes while imparting the news were on Mrs. Hapgood's. He saw a slight quiver pass over her, but not being satisfied with it in a medical point of view pushed on, saying that he had not told her the worst. Mr. Hapgood had been killed. The lady looked at him as though she did not quite understand him.

"Your husband is dead, Mrs. Hap-good," the doctor added; "he has been killed on his way home on the train from the city."

"My husband dead?" "Yes, madam-killed in a railroad accident." The lady seemed to be struggling

with her feelings for awhile, then remarked: "I'm sorry, but he deserved it; he

treated me shamefully." The doctor, disappointed, turned away and, on returning to his home, called up Mr. Hapgood and reported that the experiment had failed. However, he suggested that Hapgood keep dark for awhile. It was possible that the desired effect might come later. Hapgood promised to abide by the suggestion and remained in hiding in the city.

A couple of days after Mr. Hapgood's supposed death his wife called again on Mr. Stanley, her attorney. She was dressed in mourning and wore a widow's cap of exuberant proportions. "Mr. Stanley," she said, "have you

filed the papers in my case?" "I have not as yet, madam; in these ases we never act hastily; we hope for a reconciliation, or at least an amicable "Destroy them."

"I see you are in mourning. Has anything happened?"
"My husband has been killed in a railroad accident." "Indeed?"

"Yes. I wish your opinion as to the mount of damages I can recover." "That is a matter for compromise with the railroad company. If you cannot come to an agreement with it you

"I have been informed that the cornpany proposes to leave all claims to the

"In that case we have only to comence suit." "Please do so at once." "What amount shall I sue for? How

uch was your husband worth to you "He received a salary of \$6,000" "That is 6 per cent on \$100,000. But since we usually lay claim for much

more than we expect we will make it more than that. There is a loss, you know, beyond a pecuniary loss. You would value your damage in being de prived of a loving husband at how much?"

"A hundred thousand dollars is the least sum I would name. My husband was devoted to me."

"Very well. We will sue for \$200,-000. If we get \$20,000 it will be more than is usual in such cases."
"Twenty thousand dollars," exclaimed the lady, "for such a husband, one so good, so tender, so kind! You don't mean to tell me that I will receive no

more than that!" The lawyer explained that such claims were hard to make good. There were many delays to be expected; the railroad would doubtless fight the case to the bitter end, and it was difficult to say what a judge or a jury would so. The lady was obliged to be satisfied with this explanation, but left the office declaring that the

oss of her husband was irreparable. Mr. Hapgood by Dr. Boyd's advice and as a matter of precaution had hired a shadower for his wife, and within an hour after her visit to her attorney he had been advised of the fact. He visited Mr. Stanley and took him into his confidence, informing him of the device that had been practiced on his wife with a view to restoring her to health. Mr. Stanley promised to take no action in Mrs. Hapgood's case until hearing from her hu and the latter departed for Dr. Boyd's

office. "Doctor," he said, "it is as I feared. My wife has been to an attorney."

"For a divorce?" "First for a divorce, but since her supposed bereavement she has been there to secure damages from the railroad company for the loss of her husband. What do you suppose she claims for me?"

"I give it up." "Two hundred thousand dollars." A faint smile passed over the doctor's features, but it disappeared at once. He was deeply interested in the case, as it pertained to his profession. "You have prevented any action, I

"I have. There is no danger of the matter getting out at present. What

The doctor pondered a long while before replying, "I fear," he said, "the experiment has failed. The only hope left for us is for you to return to life. The shock did not produce the desired effect. It is barely possible that on seeing you alive and well your wife may experience a joy which will

ing her a sudden distress."

"But what?" asked the doctor.

against the railroad company."

went to Mr. Stanley's office.
"Send for my wife," he said.
