Grain and Milling Notes.

Weather conditions during the past week through the winter wheat section have been characterized by a comparatively wide range of temperature but as the wheat plant has been more or less protected by a covering of snow which was beneficial to the crop, the previous conditions have been maintained. Outside of the fly-ravaged district of Ohio, Indiana and Michigan the situation is generally favorable.

In regard to the interior marketing of grain, very little change is to be noted. The movement of wheat in the winter wheat section, continues light, and the disposition of farmers is to hold at current prices. The movement of corn is fair, though not quite so active as a few weeks ago. Feeders continue to take the bulk of the corn offered, and at many places at a premium over the shipping basis.—Cincinnati Price Current.

The movement of freight through the St. Mary's canal has increased fifty per cent in three years. The tonnage is three times that of the Suez canal and nearly three and a half times as great in 1899 as in 1889.

The higher prices which will go into effect on April 1 for United States bituminous coal at the mines are due largely to advances in wages. In no less than eight states wages are to be higher. These are Maryland, West Virginia, Pennsylvania, Ohio, Indiana, Michigan, Illinois and Iowa.
