

art. The truth is often illustrated by strikingly apposite quotations, especially of religious verse. The subjects, while not sensational, quicken and sustain interest, as "The Swiftmess of Love," "The Banishment of Tears," "Drinking from Christ's Cup," "Anchors that Never Drag," and the like. The titles of the volumes are also very attractive, as "The Heavenly Trade-Winds," and "The Lord's Arrows."

The Farringtons. By ELLEN THORNEYCROFT FOWLER, author of "Concerning Isabel Carnaby," "The Double Thread," etc. Price, cloth, \$1.50; paper, 75c. Toronto: George N. Morang & Company, Limited, and William Briggs.

Miss Fowler is the distinguished daughter of a distinguished house. Her grandfather was an eminent Wesleyan minister. Her father is Sir Joseph Fowler, late Secretary of State for India. Miss E. T. Fowler and a younger sister have won name and fame as brilliant writers. Their books abound in epigram and repartee, exhibit a knowledge of a wide range of English life, especially of the Methodist circles whose inner life they so well understand. This story is a distinct advance, we judge, on the accomplished author's previous works. It describes life in an English manufacturing district whose chief characteristics are "the making of iron and the saving of souls." It is one of the most strongly written books, and most sympathetic with religious and especially Methodist life, that we know.

The Anglo-Boer Conflict: Its History and Causes. By ALLEYNE IRELAND, author of "Tropical Colonization," etc. Boston: Small, Maynard & Company. Toronto: William Briggs. Price, 75c.

The more the history of the unhappy war now waging is studied, the more evident becomes the essential justice of Britain's contention, and the treachery and truculence of the Boers. Mr. Ireland has made a very thorough study of the subject. He quotes a letter from Rev. William Perkins, Secretary of the Wesleyan Missionary Society, of May 8th, 1899, describing the murder of the wife of the Rev. R. F. Applebe, at Johannesburg, in daylight, on the highway while going to church, at the hands of Dutch or native miscreants. No arrests were made by the Boer Government, and no efforts to secure the punishment of the assassins. Mr. Ireland's conclusion as to the cause of the

war is, in a word, "the fatuous attempt of one man to govern a republic at the end of the nineteenth century by the methods of the seventeenth."

A Mental Index of the Bible and a Cosmic Use of Association. By REV. S. C. THOMPSON. 12mo, cloth, 300 pages. New York and London: Funk & Wagnalls Company. Toronto: Wm. Briggs. Price, \$1.50.

For those who have not a lifelong familiarity with the Bible contents, and wish to escape some of the distraction caused by handling a cumbersome concordance, it is a great advantage to have in mind a simple index with which chapters, passages, and the language of texts can be naturally associated and readily found. This mental classification is made possible by a study of this helpful book. The fundamental principle of all reliable memory systems, that natural memory depends upon the association of ideas, has been applied to the Bible. The practical application of this idea is that a verse, text, incident, name, or chapter, which may not be easily remembered, must be associated in the mind with something easily remembered. The author has arranged simple rules and directions which, if studied, are sure to greatly increase the helpfulness and usefulness of the Bible.

Webster's Collegiate Dictionary. Over 1,100 illustrations. 8vo. Pp. 1,116. Price, with complete reference index: Cloth, \$3.00; sheep, \$4.00; half morocco, \$5.00. G. & C. Merriam Co., Springfield, Mass. Methodist Book Rooms, Toronto, Montreal, and Halifax.

While the "Collegiate Dictionary" is a new work throughout, and has been several years in preparation, it is in the main abridged from "Webster's International Dictionary," and retains the essential features of that great work, with all its accuracy, scholarship, clearness, and excellence of arrangement.

In its vocabulary the Collegiate is exceptionally complete. Space has been saved by disregarding unusual technical terms, obsolete and very rare words.

The definitions are complete, concise, lucid and exact, and are arranged in the historical order in which the word received its shades of meaning. Synonyms, excellent in the fulness and discrimination with which they are treated, are an important part of many of these defini-
