

The addition of Cow's Milk To Wampole's Milk Food

In nowise improves its efficacy, inasmuch as it already has the right amount of milk in it—besides cow's milk contains an excess of CASEIN, which the baby cannot digest.

By our process, this excess of CASEIN is removed, as well as the acid and other impurities which make cow's milk unsuitable for infants. **Logically speaking, the baby can no more thrive on Cow's Milk than a calf at the breast of a woman.**

WAMPOLE'S MILK FOOD

is furnished only in glass containers, which are securely sealed. SAMPLES cheerfully furnished without charge. Correspondence on the subject of artificial foods solicited, which will receive prompt and courteous attention.
