

WHEELER'S TISSUE PHOSPHATES.

Bone-Calcium Phosphate $\text{Ca}_2 \text{P.O.}_4$, Sodium Phosphate $\text{Na}_2 \text{H.P.O.}_4$, Ferrous Phosphate $\text{Fe}_2 \text{P.O.}_4$, Trihydrogen Phosphate $\text{H}_3 \text{P.O.}_4$.

Wheeler's Compound Elixir of Phosphates and Calisaya. A Nerve Food and Nutritive Tonic, for the treatment of Consumption, Bronchitis, Scrofula, and all forms of Nervous Debility.

The Lactophosphate prepared from the formula of Prof. Dusart, of the University of Paris, combines with a superior Permanganate Sherry Wine and Aromatics in an agreeable cordial easily assimilable and acceptable to the most irritable stomachs.

Phosphorus, the oxidizing element of the Nerve Centres for the generation of Nerve Force; Lime Phosphate, an agent of Cell Development and Nutrition; Soda Phosphate, an excitant of Functional Activity of Liver and Pancreas, and Corrective of Acid Fermentation in the Alimentary Canal; Iron the Oxidizing Constituent of the Blood for the Generation of Heat and Motion; Phosphoric Acid, Tonic in Sexual Debility; Alkaloids of Calisaya, Anti-Malarial and Febrifuge; Extract of Wild sherry, uniting with tonic power the property of calming Irritation and Diminishing Nervous Excitement.

The Superiority of the Elixir consists in uniting with the Phosphates the special properties of the Cinchona and Prunus, of Subduing Fever and Allaying Irritation of the mucous membrane of the Alimentary Canal, which adapts it to the successful treatment of Stomach Derangements and all diseases of Faulty Nutrition, the outcome of Indigestion, Malassimilation of Food, and *failure of supply* of these essential elements of Nerve Force and Tissue Repair.

The special indication of this combination of Phosphates in Spinal Affections, Caries, Necrosis, Ununited Fractures, Marasmus, Poorly Developed Children, Retarded Dentition, Alcohol, Opium, Tobacco Habits, Gestation and Lactation to promote Development, etc., and as a *physiological restorative* in Sexual Debility, and all used up conditions of the Nervous system should receive the careful attention of therapeutists.

There is no strychnia in this preparation, but when indicated, the Liquor Strychnia of the United States Dispensatory may be added, each fluid draohm of this solution to a pound bottle of the Elixir making the 64th of a grain to a half fluid ounce, an ordinary dose, a combination of a wide range of usefulness.

DOSE.—For an adult, one table-spoonful three times a day, after eating; from seven to 12 years of age, one dessert-spoonful; from two to seven, one teaspoonful. For infants, from five to twenty drops, according to age.

Prepared at the Chemical Laboratory of T. B. WHEELER, M. D., Montreal, D. C.

Put up in pound bottles and sold by all Druggists for One Dollar.

HALIFAX INFIRMARY,

FORMERLY

Victoria Infirmary.

A Private Institution under charge of Sisters of Charity for reception of patients requiring Surgical or Medical Treatment.

Sister Superior: **SISTER MARY VINCENT.**

STAFF.

Consulting Surgeon:.....**HON. D. McN. PARKER, M. D., 95 HOLLIS ST.**

Attending Surgeons:

EDWARD FARRELL, M. D., 205 SOUTH PARK ST., Late Professor of Surgery, Halifax Medical College. Attending Surgeon Victoria General Hospital.
