

HEAT IS TOO VALUABLE TO WASTE

The above shows a small portion of insulation work we executed at Dominion Power & Transmission Company's Plant.

To offset the present high cost of fuel, it is absolutely essential that all losses by radiation about a steam plant be eliminated. 60 to 75 per cent. of these losses can be readily prevented by the use of efficient insulating materials such as

Nonpareil High Pressure Coverings

For Covering of Steam Pipes, Tanks, etc.

Nonpareil Insulating Brick

For Insulation of Boiler Settings, Drums, Furnaces, etc.

The entire boilers and steam piping in plant of Dominion Power and Transmission Co., Hamilton, featured in this issue, were insulated with our materials, with most satisfactory results.

Write us for catalogues, samples, etc.

Armstrong Cork & Insulation Co., Ltd.

Montreal and Toronto

Also Manufacturers of Corkboard for Cold Storage Rooms, and Nonpareil Cork Covering for Brine, Ammonia and Ice Water Lines

"IMPERIAL"

This word is copyrighted as applied to Roofing Tile and defines our products exclusively. It represents the highest quality in texture, color, finish, textile strength and hardness. There are no Terra Cotta Roofing Tiles "equal to" these; they stand in a class by themselves. For literature, prices and terms, address
