Edenborough Ltd. opened its manufacturing facility in 1983 to produce a hand-painted line of stained glass suncatchers. Our in-house design department has since created several innovative applications using the basic suncatcher principle.

The DIAMOND souvenir series consists of low cost, versatile suncatchers permitting custom designs and imprints of specific locales. PETALS AND PROSE is a series combining pleasant designs with popular verses and poems silkscreened on suncatchers.

Our most innovative product, TIFFANY CORNERS, is a completely new window treatment utilizing four pieces of stained glass attached by double tape to window corners. Other applications include doors, mirrors and cupboards.

Edenborough Ltd.'s products are overwhelmingly hand-made. Each piece, however, is professionally designed, finished, packaged and supported by point of purchase displays. A commitment to service and quality has made us a leader in our field.
