- Energy Planning
- Engineering

Emergency Response Services

Energy Management Systems

Energy recovery

Engineering & Construction

Hazardous Materials Management &
Services

Hydraulic Modelling and Research

Independent Inspection

Pollution Abatement Services

Project Management Services

Company/Product

Goodfellow Consultants Inc. (GCI) was founded in 1986. Since that time the firm's staff has grown to include environmental and heating, ventilation, & air conditioning engineers, occupational hygienists, and microbiological and technical specialists.

GCI's expertise and engineering team initially centred around the field of contaminant control in the workplace. Both evolved quickly to encompass all aspects of air pollution and design of applicable controls. The team is currently involved in projects ranging from environmental audits to site decommissionings, hazardous waste to emergency response programs, and risk assessments to specialized and fume control design. GCI's engineers and designers carry projects from the conceptual stage, through preliminary engineering, to detailed engineering design and commissioning. These individuals study retrofit applications, new installations, and plan the corresponding solutions.

GCI departments are constantly being updated on current and proposed regulations in Canada and the United States. This pro-active approach in creating solutions allows clients to compete well in the future without fear of costly regulatory surprises.

In 1992, Industry, Science, and Technology Canada awarded GCI the coveted Canada Award for Business Excellence in the Environmental Category. GCI works for numerous legal firms in the United States and Canada providing expert advice in specialized fields of ventilation, contaminant control, occupational health and safety, and indoor air quality.

In the area of indoor air quality, GCI provides design consultation, conducts on-site investigations and sampling, and completes the required laboratory analysis. All results are presented in a comprehensive report which includes interpretations, conclusions, and practical recommendations. The health and safety division at Goodfellow Consultants Inc. recognizes, evaluates, and controls a variety of physical, chemical, and biological hazards. GCI sees projects through from start to finish, providing expert help every step of the way.

Current Geographic Marketing Activities

GCI has offices in the United States and Hong Kong. Clients are located in the USA, Mexico, Brazil, Hong Kong, Taiwan, and Finland. The firm's specialization in the design of fume systems for electric arc furnaces has been successfully marketed internationally.

Contact Sought

Goodfellow Consultants Inc. is seeking strategic alliances with other consulting firms for technology integration. The firm's primary focus is on Mexico, Latin America, and the Far East countries.
