

8) Sakie Point at 55°03'25" - 133°13'30"W and then

9) westward along the parallel of latitude of 55°03'25"N to the limit of the U.S. Exclusive Economic Zone.

Canada agrees to close its troll fishery in Areas 1, 3, 4 and 5 for the same time period.

(c) between 15 and 22, Alaska will close its troll fishery beginning in statistical week 31 and continuing for 10 days in the same waters referred to in subparagraph (b) above. Canada agrees to close its troll fishery in Areas 1, 3, 4 and 5 for the same time period.

4. In addition, the Parties agree:

(a) Canadian managers from the North Coast Division and U.S. managers from Southeast Alaska will exchange on a weekly basis information on coho regarding stock status, catches and fishery management information including open areas and times for each fishery;

(b) the Northern Boundary Technical Committee shall develop a work plan to develop MSY escapement goals for Skeena and Nass River coho, to improve stock assessment programs, to develop in-season and post-season abundance determinations and to improve fishery performance data;

(c) to complete by June 30, 1999, a bilateral report by the Northern Boundary Technical Committee on the status of coho salmon stocks in the Northern Boundary Area;

(d) that the calculation of the catch per unit effort (the "CPUE") associated with the closure of the Southeast Alaska troll fishery when the all-gear harvest is projected to be less than 1.1 million wild fish may change over time as methods and assessments improve. Any new method will be bilaterally reviewed prior to its implementation;

(e) that, in the event that Alaskan troll fishery effort in FPD Area 6 is insufficient to provide necessary CPUE data for the determination under paragraph 2 above, the Parties agree to consult prior to statistical week 29 and consider other in-season abundance data to make such determinations; and

(f) that, during the period of closure referred to above, the Parties may agree on the employment of selective fishing techniques in their troll fisheries to access other species or stocks pursuant to relevant Annex IV provisions.

5. Alaska will maintain its troll management plan with regard to closure of up to 10 days in early to mid August. Alaska may modify its troll management plan in future years to address or reduce incidental mortality of chinook in the coho fishery. Alaska will consult with Canada regarding any such changes prior to implementation.

6. The provisions of this agreement are without prejudice to the position of either Party with respect to the location of the maritime boundary in the Dixon Entrance area.
