#### CAPITAL GAINS TAX

Question No. 1,699—**Mr. Cossitt**:

What was the total amount of capital gains tax collected by the government for each year since the tax came into effect and what was the total collected for all such years combined?

**Mr. Ed Lumley (Parliamentary Secretary to Minister of Finance)**: Under the Income Tax Act, one-half of capital gains realized since 1971 are added to income for tax purposes. Capital gains, therefore, are not taxed under a separate capital gains tax. Because of this, it is difficult to determine precisely how much income tax is attributable to capital gains as compared to other components of income for tax purposes. Using available data, estimates can be made of the approximate amount of income tax attributable to the taxable portion of capital gains. Rough estimates for the years 1972-1976 are as follows:

	Federal Income Tax on Capital Gains (\$)				Total 1972- 1975	1976
	1972	1973	1974	1975		
Individuals	40	70	80	100	290	160
Corporations	30	60	70	90	250	*
Total	70	130	150	190	540	

\* No estimates are yet available for 1976 for corporations.

It should be noted that capital gains are subject to provincial income tax in addition to the federal income tax. Provincial revenues from this source would be approximately one-third of the federal revenues.
