

July 21st, 1925.

Dr. H. C. Perrin,
C/o. Bank of Montreal,
Waterloo Place,
London, England.

Dear Dr. Perrin:-

I am sending you herewith copy of a letter received from Mr. Leo Pol-Morin. This gentleman is very highly recommended by Sir Lomer Gouin, Hon. Philippe Roy and Mr. Edouard Montpetit. Perhaps in view of our conversations you might like to correspond with him.

You will, I know, be very interested to hear that during a visit to Quebec I had a long talk with Dr. O'Neill and was both surprised and pleased to hear that on his own initiative he had been taking up the question of musical education with the Council of Public Instruction and with the schools in Quebec. He received a very favourable response. It would make the fortune of our new plan, if we were able to have students who would come to college with the idea of music as an education rather than a musical education well instilled into their minds. I am going to make a trip to Quebec some time this month or next month and see whether something cannot be done to carry this movement a little further.

With best wishes to Mrs. Perrin, Kathleen and yourself. I hope you are having a really pleasant summer.

Yours faithfully,
