First Rose Society Holds Its Meetings-Bright Future Assured.

Aim to Have Rose Gardens in City and Coun-

A meeting of the first Rose Society in Canada was held on Wednesday, at the home of Dr. and Mrs. Allen Baines, 228 Bloor street west, Toronto, who kindly lent their beautiful rooms for the purpose. The utmost enthusiasm prevailed, and it is evident that the society, supported, as it is, by many of the leading people in Toronto, is destined to have a great future. great future.

proceedings opened with the introduction to the meeting by the president of J. T. Moore, of Moore Park, who is the hon president, and in him it was felt that the society possessed one who has the welfare of this organization thoroly at heart. "Canada can grow roses; that has been proved by many a wise and skilful amateur. Today there are rose gardens here which can hold their own with those across the sea. It is our proud aim to increase the love of her beauty and to scatter rose gardens of all kinds, large and small, thruout the length and breadth small, thruou of the land.

The wind carries over many a moorland and mountain side the fragrance of and mountain side the fragrance of sweet brier, and the glorious crimson from thousands of the beautiful Rosa lucida is seen in rough places when the cool light of early winter days floods over the land; therefore let us entwine the rose among our emblematic maple leaves, which form for it a fitting surrounding.

The Rose Society, then, is to be a living reality, a joy to all who love

living reality, a joy to all who love the flower, whether theres be a luxurious resary or a lowly simple plot in city or suburb. It is to be a cosmopolitan society appealing to all. It will join its efforts to those of other flower societies in the endeavor to make Ontario, and Toronto in particular, a very sweet name, in which horticulture and commercial activities go hand in hand for the mutual advancement of the whole country in this great and prosperous land.

Much business was transacted. It is the intention of the society in due

course to have a room or rooms of its own, a library, books and pamphlets to assist members in the cultivation of the flower, exhibitions, lectures; and no stone will be left unturned to help each individual to make the pursuit of rose-growing a real success.
