

P O S T S C R I P T.

THE reader is not to think that the foregoing table contains the whole expence of the German service. The article of forage and extraordinaries is there put at 2,167,903 l. 12 s. 6d. because that was the sum which the friends of the war admitted it to cost : but the several grants for the year 1760, applicable to that service, amount to 3,661,747 l. 16 s. 10 d. What deductions are to be made does not appear by the Votes, nor perhaps can easily be known from the accounts, as they have hitherto been delivered into parliament.
