Mrs. Norman Douglas Wilson (Ellie Sheppard) will receive for the first time since her marriage on Friday, Oct. 11, at her home, 128 Glen road, Rosedale.

Mrs. Dora Meyer Culkin has issued invitations to the marirage of her elder daughter, Mary, to Mr. Otto F. Beck of Buffalo on Tuesday, Oct. 15.

Ladies! Attention is directed to the display of Fall Millinery at Rutherford's, 542 Yonge street, where all the newest models are being shown:

FEROCITY TO

Savagery of Conflict in Balkans May Be Unparalleled, It Is Feared.

NEW YORK, Oct. 9 .- (Can. Press.)-A cable to The Tribune from London Expert military opinion is divided as to the probable course of the Balkan war, but it is agreed on all sides that the struggle will be one of hideous and perhaps unexampled ferocity. Moreover, whichever side is success-ul, the peace of Europe will be imperiled. Austria is resolved not to per mit any territorial expansion by Servia or Bulgaria, while in the event of the Turks sweeping their armies before them and trampling the Balkans under foot, the sympathy of the Rusmian people with the conquered Slavs will be aroused and the Russian Government forced by popular passion to take an active part in the game.

Edward Howard Griggs on "Human Progress"

appreciative audience in the Guild Hall last night at the first of his course of eight lectures on "Human Progress." The address proved to be a proliminary approach to the course of the course of the lectures of the course of the lectures of the course o Progress." The address proved to be a preliminary survey of the field for "A Study of Modern Civilization," which will be continued weekly on Wednesday evening until November 27. Next Wednesday the topic is "The Causes of Human Progress," followed by "Elements of the Ideals of Life," "Historic Sources of Modern Civilization," "Womanhood and Human Progress," "The Problem of Social Reform," "The Social Ideal in Modern Civilization," and "Education and Democracy." But these titles suggest One of the new two-toned velvets, showing gray and blue, was made up as shown in this sketch. The vest and mocracy." But these titles suggest nothing of the warmth and brilliance small inlay on the collar are of blue and vivid interest of Mr. Griggs' treat-ment, which is like the conversation of for the chance pull or push of alm-The wide girdle is placed rather high The wide girdle is placed rather high and closed under a buckle, covered with the material. Across the front is a suggestion of a sash, for which black were Prof. Michael Hambourg, Messrs. Jan and Boris Hambourg, Dr. Torring-ton, Mr. W. C. Forsyth, Mr. Hector Charlesworth and Dr. Ham. Prof. Hambourg also gave a small dinner on Tuesday evening when his small dinner on ming.

The wide girdle is placed rather high and closed under a buckle, covered with the material. Across the front is a delightful and encyclopedic genius, sparkling and tender, wise and witty, and from soul to soul. "Friends and fellow-students," he began, after Dr. J. L. Hughes had introduced him. He spoke from the point of view of the chical factors which have been dynamic in the development of mankind. The nineteenth century had been one of science, in which half of our organized and reasonably exact know-ledge had been classified. Science was merely rationalized common sense, and the twentieth century had so far been applying its generalizations to human life, tracing the variety on the surface, back to the unity at the heart. There was distinctly a new scientific spirit in history, religion, diterature and art, and the science to feel the new impulse of ethics. The twentieth century promised to be a century of hu-manism, turning from analysis to synthesis and interpretation. The time was ripe for a new philosophy of edu-cation, and we needed a new Plato and Aristotle to take the material of the

permitted to enter the room for fear twentieth century and organize it. of carrying contagion, about the house.

Possibly you have heard of people who, believing that children must have certain diseases, deliberately ex-There was a tendency, illustrated by Herbert Spencer, to carry over into humanistic study all the results of scientific achievement. Spencer was intructive, but not scientific. Mr. Griggs had no hesitation in saying that Aristotle was more scientific in his me more deadly than most people think;

It was impossible to establish the concept of progress in the field of biology. Nature knew nothing of and, remember, it is not necessary for children to have measles, whooping-cough and the rest. Scarlet fever is biology. Nature knew nothing of higher and lower. The single cell biology. among the dreaded diseases. It is one swimming in putrid water was practically immortal. Why did man speak of the higher in his specialized and keeping of children off street cars and more integrated relations? Wordsworth might speak of the stars as from public places. Do not take it for granted that a vomiting child is "only bilious." Keep away from him. As lad nothing to do with their respect to the foreign mission with respect to the foreign mission with respect to the foreign mission work. scarlet fever or discharge from the ears or nose, the danger of contagion only had meaning within a conscious is still present. Everything with which the patient has come in contact during and duty were human categories. his illness may be regarded as dangerous even months after the illness. If your child has been definitely exposed to diphtheria, a dose of diphtheria antitoxin will prevent him tak-

Pleasures of the Arena Extended. The beautiful selections heard at the Arena this week may be yours any time if you drop into the Victrola Par-lors of "Ye Olde Firme" of Heintzman Co., Limited, 193-195-197 Yonge street.

"No Person Allowed"

At the direction of Chief of Police Grasett the following notice was posted on the wall be-side the door to the detectives' office at the city hall yesterday afternoon: "No person is allowed in this room unless accompanied by a police officer. and then on police business." (Signed) "Chief Constable."

Labor, light and the cost of production

INDUSTRIAL statistics show that the average cost of all finished products is one-third manufacturing and two-thirds material. The cost of the latter is practically fixed while the former being variable determines the comparative cost of production.

AS A MANUFACTURER you strive mainly for three things: increased output, improved quality and decreased cost. These are dependent upon machines and labor, the effectiveness of one being determined by the efficiency of the other.

Labor can be efficient only when

working in pure air, at a moderate temperature, and with proper light. The absence of any one renders the other useless. Ventilation and temperature are matters for the heating and ventilating engineer, but the placing, arrangement and regulation of your lighting are problems for the illuminating engineer.

A SIDE FROM the effect proper lighting has on the efficiency of your workmen it is an economy in itself. If your present system of illumination is not from fifty to one hundred per cent. better now than it was three years ago, you are wasting money for current you do not utilize, and you are wasting current in light that is lost on the walls and ceilings. Nothing employed by you in manufacturing has been improved to a greater degree within the past five years than the methods of factory illumination.

OOK INTO your lighting conditions. Send for a Toronto Electric Light Company Specialist whose assistance is given without charge or obligation.

Afternoon, So That Children May Attend the Arena.

sical Festival here, owing to the many requests from people, both in town and in the neighborhing towns and cities, decided to give a special popular matinee on Friday. The program will equal, night at the morgue and adjourned if not surpass, any that has been yet Coroner Dr. Currie until Oct. 17. offered at the musical festival in the Arena. The main reason for the popular matinee which is being given is on account of the children, who, for educational purposes, cannot attend the evening performances, they having to remain at home; then, again, there is the financial side, which must be considered. For their benefit the performance will be given at the very popular sum of 25 and 50 cents. The public will also be admitted at these prices, and a large crowd of mothers and children are expected. Under the sanction of the public school board of Toronto, the public schools will be closed Friday afternoon, so that they may attend. The seats for this performance will go on sale at the Arena box office at 9 o'clock Friday morning. The public may be interested to know the immense program that will be offered. Besides Nahan Franko and his wonderful orchestra of 62 of the very best musicians in New York, it will include the sale water.

(From The Woman Beautiful.)

A dull, drab, muddy complexion, or a blotchy, pimply or freckled skin, can by a quite simple, harmless and inexpensive method, be changed to one of flower-like radiance and purity. One ounce of common mercolized wax, sold to two weeks. By its remarkable abtence will go on sale at the Arena box offices at 9 o'clock Friday morning. The public may be interested to know the immense program that will be offered.
