Liquidation Breaks Out in Last Hour, and Losses Are Fairly Extensive.

## LIVE STOCK MARKET

The week on the Union Stock Yards has been marked by more than ordinary strength for practically all classes of cattle, the receipts for the week totaling about 4500 head, as against nearly twice that number for the week before. The lighter receipts were reflected in the prices which ran from 25c to 35c and in some cases 50c higher. Anything of fair to good quality met with a ready sale, but the percentage of good killing stuff was light, and the bulk of the cattle generally was very ordinary.

All thru the week the receipts have been light, and there has been a steady demand for good butchers' cattle, and demand for good butchers' cattle, and more would have sold well. The demand for canners and cutters was better, and the stocker and feeder market for good quality steers is decidedly stronger. As

quality steers is decidedly stronger. As to choice milkers and springers we would say there is a better inquiry.

On Monday there were 3100 lambs on sale, and the market opened strong and 25c to 50c up with choice lambs selling up to 15c, and on Tuesday the market was appreciably stronger, and thruout the week trade has been steady to strong with choice lots, selling up to \$15.60. The outlook is for a good market next week. Sheep opened steady, butchers selling from 9½c to 10½c; breeding ewes from 11c to 13c, closing unchanged.

Telling interest, which met the same fate. The insiders this week were again approached and asked to name would undoubtedly make good in a very large way, also that the production stage would be reached early next year, a refusal was again fortheoming.

With a vein system proven for over 800 feet in length and likely to extend another 1000 feet, and the self-supporting stage likely to be reached within a few months, Wasapika is de.

Fairly Extensive.

New York, Nov. 22.—In its chief essentials, today's stock market was largely a duplicate of the previous session, prices reacting very generally after an early manifestation of comparative strength.

Trading was very much broader, but the occasional intervals of activity were invariably at the expense of values. Professionals governed the day's operations, public or investment interest being allow for the restraint, local financial institutions maintaining their attitude of extreme conservatism, altho tomorrow's bank statement is expected to rectify in particular to undergo radical readjustment in the transition to peace bases.

The caution with which various corporations are proceeding in this connection was further illustrated by the suspension of dividends, were assoned to feneral Chemical directors to discontinue extra stock dividends, Metals, secondary motors, utilities and fertilizers bore the brunt of the liquidation at extreme recessions of one to two points in telephone and telegraph shares were ascribed to federal control.
