THE USES OF WATER

Everything we do at home or abroad compels the use of water. We drink it, cook with it, wash with it, bathe in it, clean with it, and take pleasure on it. Our bodies are three-fourths water, and our food is nine-tenths water. Water therefore, is an all-important factor in life, and a tremendously important one in Health.

DRINKING

Water is perhaps the most important way in which we use it, for through drinking we convey impurities into the body. Keep the system free of waste matter, germ life, lime and other causes of disease that follow the drinking of ordinary water, and good health will follow.

"HYGEIA" DISTILLED WATER Drunk regularly will purify the blood, and in

doing that will promote inward cleanliness and organic strength. "Hygela" being absolutely pure, purifies wherever it goes by dissolving and carrying away all waste and secretions. Suppose you begin drinking it now.
