

FOR UNIFORMITY IN MINING LAWS

Royal Commission on Unification of Labor Acts Makes Recommendations.

DISCUSS MINIMUM WAGE

Forty-Eight Hour Week Also Favored Except in Agricultural Pursuits.

Ottawa, April 30.—Dominion-wide application of the principle of a minimum wage and a 48-hour working week for all women and girls, excepting those engaged in domestic or agricultural employment, was strongly favored by the royal commission on the unification of labor laws at the session held today.

Other important items at today's session included the adoption of a motion that a committee of five be appointed to report upon the unification and harmonizing of law on industrial disputes within Canada, and a further recommendation that all laws at present existing in any province dealing with the improvement of sanitation or the protection of life should be made general to such other industries as may be possible throughout the Dominion.

The five named for the committee on unification were Messrs. Moore, Gillis, Coughlan, McEwen and Leckie, with F. A. Acland, deputy minister of labor, and ex-officio. The conference will resume its sittings tomorrow.

The resolution dealing with the pay and working hours for women came from the committee on minimum wage, and read as follows:

"We approve the principle of a minimum wage for women and girls, and recommend that a competent authority be created in each province in the Dominion to establish a minimum wage adequate to maintain self-supporting women and girls, and such authority shall be empowered to fix hours of employment for such women and girls not already provided by legislation, and further recommend that such hours of employment should not exceed 48 per week, except of employees engaged in domestic or agricultural employment."

The committee on mines and mining laws reported that it had investigated the departmental folio on mining laws, item by item, for each province. The committee found that many of the provisions existing in the various acts by local conditions, and concerning which no practicable uniformity is possible.

The committee on mines and mining laws recommended that all provinces should have uniform legislation in the following respects:

1. That the minimum age for boys working above ground, and that no boy be allowed to work on the surface until he has attained the age of 14.

2. That no boy under 18 years of age should be employed in any mine, and that no person shall operate any power machinery or over a mine, or raise or lower persons in a mine.

3. In order to bring uniformity in mining laws, we recommend that all provinces should have uniform legislation in the following respects:

4. That payment of wages at least law in all provinces where such legislation is not already in existence, such payment to be made by cheque or currency, and that every person who employs or contracts with any person for labor for wages shall have a lien thereon.

5. That legislation be enacted in all provinces whereby the wages of any employee, except those due for powder, coal, oil, rent and such doctors' and workmen's compensation boards, and supplies necessary to the execution of work carried on by such employee, shall not be subject to attachment of an employee to payment of a debt, except the written consent of the employee, given individually, or by collective agreement.

6. That where in any province, examinations are required for persons of competency of miners, mine managers and other working officials, such examinations shall be conducted by a board consisting of a government inspector, a mine manager and a mine manager.

7. We would recommend that all candidates for certificates as mine managers, mine inspectors, etc., shall have at least five years' mining experience, and that no person shall be employed in a mine unless he has at least 23 years of age.

8. We recommend that, without limiting the powers of inspectors, an inspector shall have power to enter, inspect and examine any mine or any part thereof at all reasonable times by day or night, to examine into the conditions respecting the state and condition of the mine, the ventilation and safety of mines, to give notice in writing of any matter, thing or practice which he considers dangerous or defective and of its immediate remedy. Section 21 of the act of arbitration consisting of a judge and representatives of the parties, the decision of this tribunal to be final.

9. Must Be Well Ventilated. It shall be the duty of every person having an adequate amount of ventilation passing therein, and that all mines be examined before the work is begun, and that a report of such examination be made in a book to be kept at the mine for the purpose of the law, and be available to any workman employed in the mine.

10. The question of health of employees in mining camps is now being investigated by the provinces concerned, with a view to fully protect the workers and as far as possible unify the laws, and we submit that this matter be referred to this tribunal for action.

11. Resolved, that the present laws with reference to special investigations of mining camps is now being investigated by the provinces concerned, with a view to fully protect the workers and as far as possible unify the laws, and we submit that this matter be referred to this tribunal for action.

COBALT COMPANIES ON THEIR VENTURES

One Strikes Dry Hole, Another Salt Water—Kerr Lake's Mistake.

Cobalt, April 30.—In their search for oil the Nipissing has found a "dry" hole in Texas and the Hollinger Consolidated some water in Kansas. The Mining Corporation has been moving round the world at such a rapid pace that no reports of mishaps are as yet received.

The Kerr Lake has been distinguishing itself in the home field. Its recent action in regard to the Mondouan, now known as the Peerless Mining Company, is fairly characteristic of the methods of the Cobalt companies.
