CLOSING STOCK LETTER.

By Direct Private Wires to J. C. Mackintosh & Co.
New York, Oct. 26.—Today's stock market was as narrow, listless and devoid of feature as any of its immediate predecessors. Northern and Western was fairly active and steady throughout the session in anticipation of an increase in the dividend at the afternoon meeting. These expectations were realized but this action did not bring virtually discounted. The copper shares were somewhat heavy and room traders, perceiving the futility of attempts to stimulate bull activity in the general list, operated for scalping profits on the short side. The final range of prices was fractionally below last night's closing. An uptrend in sentiment was maintained fairly cheerful on the theory that bear news had been discounted and that in the ordinary course of events a normal recovery should begin upon the development of any favorable news. The tobacco plan, as approved by the courts, will have an important bearing upon the immediate course of prices.
