

# A WONDERFUL DISCOVERY

An eminent scientist the other day, gave his opinion that the most wonderful discovery of recent years was the discovery of Zam-Buk. Just think! As soon as a single thin layer of Zam-Buk is applied to a wound or a sore, such injury is insured against blood poisoning! Not one species of microbe has been found that Zam-Buk does not kill!

Then again, As soon as Zam-Buk is applied to a sore, or a cut, or to skin disease, it stops the smarting. That is why children are such friends of Zam-Buk. They care nothing for the science of the thing. All they know is that Zam-Buk stops their pain. Mothers should never forget this. Again, As soon as Zam-Buk is applied to a wound or to a diseased part, the cells beneath the skin's surface are so stimulated that new, healthy tissue is quickly formed. This forming of fresh healthy tissue from below is Zam-Buk's secret of healing. The tissue thus formed is worked up to the surface and literally casts off the diseased tissue above it. This is why Zam-Buk cures are permanent.

Only the other day Mr. Marsh, of 101 Delorimer Ave., Montreal, called upon the Zam-Buk Co. and told them that for over twenty-five years he had been a martyr to eczema. His hands were at one time so covered with sores that he had to sleep in gloves. Four years ago Zam-Buk was introduced to him and in a few months it cured him. Today—over three years after his cure of a disease he had for twenty-five years—he is still cured, and has had no trace of any return of the eczema.

All druggists sell Zam-Buk at 50c. box, or we will send free trial box if you send this advertisement and a 1c. stamp (to pay return postage.) Address Zam-Buk Co., Toronto.

# WANT DETAILS OF NUMBER OF BOATS CARRIED BY SHIP

Washington, April 16.—A quick report from the White Star line on the number of lifeboats and life rafts carried by the Titanic has been telegraphed for by Supervising Inspector Usher of the government steamboat inspection service.

# STEPS NEEDED TO PREVENT NEEDLESS COURSE ACROSS POND

London, April 16.—Sydney Buxton, President of the House of Commons, was asked in the House of Commons this afternoon if he would take steps to prevent liners proceeding to New York from taking the northern route for the purpose of breaking records, and whether he could state the number of lifeboats carried on board the Titanic as compared with the number of passengers. Mr. Buxton said he must have notice of such questions.

Coming from Japan.  
Rev. K. C. Hennigar and Mrs. Hennigar (formerly Miss Mac Hart) are now on their way home from Japan. They will probably reach here in June.

# MEN WHO DON'T EXERCISE

Suffer From Indigestion, Headaches, Poor Appetite, Sleeplessness.

Nothing So Sure to "Set Up" a Man, Make Him Feel Brisk and Vigorous as Dr. Hamilton's Pills.

Lack of exercise and overwork were the causes that combined to make most of the men who suffer from indigestion, poor appetite, sleeplessness, etc. Dr. Hamilton's Pills are one of the best known citizens in Woodstock.

In his convincing letter Mr. Woodstock says:—

"A year ago I returned home after

a long trip, completely worn out. I was so badly affected by chronic indigestion, so much overcome by constant headaches, dizziness, that I desired of ever getting well. I was always tired and languid, had no energy and spirit, found it difficult to sleep for more than five hours. My appetite was so feeble that I ate next to nothing, and in consequence lost weight and strength. I was pale and had dark rings under my eyes that made me look like a shadow.

"It was a blessing that I used Dr. Hamilton's Pills. In one week I felt like a new man. The feeling of weight and nausea in my stomach disappeared. My eyes looked brighter, color grew better, and, best of all, I began to enjoy my meals. The dizziness, languor and feeling of depression passed away, and I fast regained my old-time vigor and spirits. Today I am well—thanks to Dr. Hamilton's Pills."

For health, strength, comfort and good spirits there is no medicine like Dr. Hamilton's Pills. Beware of substitutes, and don't let any dealer palm off some other pill on which he can make more money. 25c. per box, or five boxes for \$1.00, by mail from The Catarrh Company, Kingston, Ont.

# REMARKABLE TACTICS ADOPTED IN THIS STRIKE

A PRETTY PATERSON SILK MILL GIRL.

Paterson, N. J., April 15.—A series of remarkable strikes are in progress here and in adjacent New Jersey textile centers. Unusual tactics are used. "Peaceful means," is the slogan.

All forms of disorder and even peaceful picketing are barred. The strike leaders notified the strikers that if any of them took the law into their own hands the union would not help them out of trouble with the police.

Strange to say, 5,000 broad silk weavers, in Paterson mills controlling nearly 90 per cent. of the product, won their full demands within three weeks, pay advances ranging from 15 to 20 per cent.

Something like 15,000 men, women and children in the silk, cotton and wool mills are now on strike. Nearly every European nation is represented. Driven to desperation by low wages and high living cost they struck spontaneously in mill after mill, turning their union afterward.

The strikers are being managed by a group of donors connected with a branch of the Industrial Workers of the World, with headquarters in Detroit. These men stand for "industrial reform by peaceful means and political action." They split away from the I. W. W. "direct actionists" several years ago and do everything to discourage violence.

During the strike here there have been only three instances of "violence." A girl with a crowd of companions, while leaving the mill to strike, tied her red shawl to a stick and flung it as she walked along a street. A policeman looked her up. She was fined \$5. A striker who declares that he was walking peacefully on a street, was set upon by a private mill detective and savagely beaten. The detective said the man

had threatened a "scab." The striker was arrested and fined. The union refused to pay the fine. The police in Paterson, evidently thinking that they must act in some capacity, harassed the strike leaders, ordering them out of a police court when they came to bail out the girl who had waved the red shawl and attending all of the strike meetings. The unionists did not resist.

With all of the usual advantages of a strike, such as the fact that the strikers have stood solidly together, they have stood solidly together. The police in Paterson, evidently thinking that they must act in some capacity, harassed the strike leaders, ordering them out of a police court when they came to bail out the girl who had waved the red shawl and attending all of the strike meetings. The unionists did not resist.

A singular feature of this industrial upheaval was that while the strikers include a variety of nationalities, many with violently opposed prejudices, they have stood solidly together. It is also a freak incident that many of the English speaking operatives have declined to strike with the foreign element, permitting the latter to carry the burden. This is merely looked upon as a regrettable by the strike leaders who say "their selfishness will shame them some day."

One of the chief demands of the silk weavers was the abolition of the "four loom" system. This system meant that a man or woman who had previously handled two looms must handle four, without equal compensation. The strikers protested that this meant nearly double work and would throw many out of employment. Month after the workers presented the

being torn down—worthless adipose tissues are being torn away.

Short Muscles Deceiving.

One must counteract the effects of pent-up, indoor, sedentary habits. This cannot be done by the exercise of the short muscles, for one must sweat out the poisons and sweat out the fat from the system. And right here comes in the principle that cleanliness comes next to godliness. Cleanse the pores of the skin. It is absolutely imperative for health. Do not load the pores with your own poisons and then let the fetid substances dry in a form of waste—a type of poison. After work always remember the bath and the rubdown. They do as much good as the exercise. Cleanse the pores of their poisons; it will actually aid in the rebuilding of the physical organism.

Certain kinds of exercise build long muscles. Here is an illustration of how two different results may be acquired from the same equipment. Take the waist and set it up rapidly—with short, jerky pulls—and the short muscles begin to develop. But take long, wholesome, easy swings and the long muscles build up. This one is made more tensile and more durable and better in every sense.

Walking develops the long muscles of the legs, but running, at a slow, easy, dog trot, will develop the long muscles of the arms, chest and shoulders as well. Heavy dumbbells develop short muscles; light bells develop long muscles. Use light gymnasium equipment. Go at it easy but keep at it, adding every day a little to the time devoted to the exercises.

Majestic to Commence.

D. J. Purdy says he is going to start the Majestic Thursday, going as far as Gagetown, or farther if possible.

Donations Acknowledged.

The ladies' committee of the Protestant Orphan's Home acknowledge with thanks the following donations: Mrs. Warwick, framed pictures; A. L. Goodwin, a barrel of apples; W. G. Estabrooks, a crate of onions and a barrel of apples; the ladies of St. Andrew's church, bread, biscuits, muffins and six shaker shirts; Mrs. W. O. Raymond, oranges, candy, eggs and hair ribbons; Mrs. George McLeod of Picton, hot cross buns.

grievance to John Golden, president of the United Textile Workers' Union, affiliated with the A. F. of L., but Golden, who was also a stumbling block in the Lawrence strike, declined to oppose the four-loom system. Now the mill owners have returned to the two-loom plan in many of the mills. Skilled silk weavers of \$12.25 for men and \$11 for women. The lowest paid operatives are girls and women employed mainly in specialty shops, like the handkerchief factory, ribbon factory and on the cheaper grades of cotton goods.

The peaceable strike seems to have rather disconcerted the mill owners who are accustomed to rely on police clubs and militia rifles to break a strike and protect imported strikebreakers. The police in Paterson, evidently thinking that they must act in some capacity, harassed the strike leaders, ordering them out of a police court when they came to bail out the girl who had waved the red shawl and attending all of the strike meetings. The unionists did not resist.

# WORSHIP OF THE MIKADO RULES JAPS

Dr. Yamakawa in Trouble for Opposing Scheme for Statute.

Suicide of Official Responsible for Slight Accident Wins Imperial Endorsement—Eternal Feminine Arrested for Breaking Rule.

Tokio, April 16.—Because the Emperor of Japan has made an imperial grant of 500 to the family of a man who committed suicide by the harkani process, a section of the Japanese press has been indulging in unexpectedly open criticism of the lengths to which the cult of Mikado worship is carried by officialdom.

At the grand manoeuvres held in Kyushu the train in which the emperor was to travel, left the track at 3000 station. One of the station officials, named Shimizu, who was responsible for the accident and the consequent delay in the emperor's journey, thought it incumbent upon himself to commit suicide by harkani as the most appropriate method of expressing contrition. When this touching act of loyalty was brought to the imperial notice the Mikado was pleased to grant the sum of 500 yen to the family of the man who died as a token of condolence. The people of the locality were deeply touched by this act of the emperor, and a political association at Fukuoka, styled the Gensyo-sha, formulated a scheme to erect a monument to the dead official in order to show their admiration for his courage in this sacrificing his life in recognition of his responsibility.

Opposes the Scheme.

This incident has had a no less significant sequel among the fanatical still operative among large sections of the native population. When the above scheme was first mooted, Dr. Yamakawa, president of the Gensyo-sha, wrote to the local newspaper against it, on the ground that however grave and regrettable the accident to the emperor's train may have been, he did not consider that it warranted the sacrifice of human life in expiation for the emperor's error. He could not conscientiously praise the action of the official or endorse the idea of perpetuating the memory of it by erecting a monument.

While on this subject Dr. Yamakawa also referred to the many cases of sacrilege in the past in the effort to rescue the imperial photograph from school buildings destroyed by fire. Schoolmasters and other officials have frequently been killed in the effort to save the photograph from destruction. In this manner in their exaggerated conception of patriotism, Dr. Yamakawa admits that the portrait of the emperor is an important thing, but insists that it cannot be compared with that of the life of a teacher engaged in useful work for the benefit of posterity. He expresses doubt as to whether it is in accord with the wishes of the emperor that his portrait should be rescued at the cost of human life.

The good people of Fukuoka waxed terribly indignant at what they regarded as the disrespectful and even "rebellious" utterances of the worthy professor. He was denounced as a very dangerous person to be at the head of one of the Empire's highest institutions of learning, and thus became an object of fierce attack. A deputation of citizens repaired to the capital and made representations to the subject to the Department of Education, demanding the removal of Dr. Yamakawa from his post.

Cult of the Mikado.

One of the points of etiquette rigidly enforced in connection with imperial journeys in this country is that on no account must the Emperor or any other member of the imperial family be viewed from an elevation, however slight. Those who venture to disregard this rule do so at their peril.

A few days ago a train in which the Crown Prince was travelling was expected to pass through Kanagawa, and the police of the first named place were instructed to make the necessary preparations. Just before entering the Kanagawa station the line passes under a bridge which is the only connecting link for traffic between the two embankments. In order to preclude the remotest possibility of such a sacrilegious action as that involved in looking down upon a member of the imperial family the police closed the bridge to traffic of all kinds for some time before the train arrived and until after it had passed this danger point.

Strangely enough, considering the ordinarily submissive nature of the Japanese eternal feminine, a woman named Urano had the temerity to ignore the orders of the police, as she was in a hurry to reach home, and proceeded to cross the bridge. She was pounced upon by an officer and arrested.

He testified that he had examined Mrs. Wright and found her sane.

What would you think of your wife if she left your children constantly alone, saying they were in God's care?" asked Mr. Drew of Dr. Arnold.

"That never happened to me so I cannot say what I would do," replied Dr. Arnold, "but the testimony in this case is that Mrs. Wright did not entirely abandon her children. She left them in care of a maid."

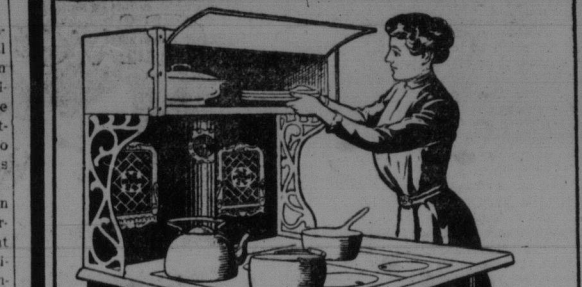

"What would you do if your wife started to smother her children?" asked you would not give her twenty-five cents?" was Mr. Drew's next question.

Dr. Arnold was about to frame an answer when he was stopped by an objection from Hyacinthe Ringrose, who represented Mrs. Wright, and who said that Mrs. Arnold was not on trial.

The jury received the case at the close of court last evening and today will return a sealed verdict.
