

Practical Medicines and Pathology will receive that attention it merits. Lectures will be illustrated by diagrams, charts and instruments.

GENERAL CHEMISTRY AND CHEMICAL PHYSICS.

PROFESSOR BOWMAN AND PRINCIPAL MERCHANT.

In these subjects the lectures will be accompanied by experimental demonstrations. To this end the Chair has been fully equipped with all necessary apparatus. All will be taught with special reference to their application to medicine.

PRACTICAL CHEMISTRY.

LECTURER—HARRISON.

The laboratory of Practical Chemistry is probably second to none in the Dominion in the matter of fittings, no expense having been spared to make the room convenient and useful to the students, each of whom performs for himself every operation of the course, which embraces Inorganic and Organic Chemistry, Toxicology and Urinary Analysis, and is kept within the limits of that which will be of ultimate practical value, rather than that which would be merely crammed and then forgotten.

MATERIA MEDICA AND PHARMACY.

LECTURER—DR. J. F. BURKHOLDER.

In this course special attention will be given to the most important drugs and their preparations.

A complete collection of the different medicinal agents in their various forms is at the disposal of this department, and will be utilized to make the student familiar with the drugs.
