

**LAMB'S**  
**SUPER-PHOSPHATE OF LIME,**  
 \$40 PER TON.

PUT UP IN BARRELS CONTAINING ABOUT 225 lbs. DELIVERED FREE AT RAILWAY STATION, TORONTO.

FINE BONE DUST, \$27.50 PER TON.

HALF INCH BONE DUST, \$22.00 PER TON.

**LAMB'S**  
**SUPER-PHOSPHATE OF LIME,**  
 MATURES CROPS FROM 10 TO 15 DAYS EARLIER, AND INCREASES THE YIELD 100 PER CENT.

**TESTIMONIALS:**

(FROM THE HON. GEO. BROWN, TORONTO.)

I certify that I purchased this spring, from Messrs. Peter R. Lamb & Co. Ten Tons of Super-Phosphate, and used it on my farm, Bow Park, near Brantford. I have found very great advantage from its application to the Indian Corn and Oat Crops, and the young grass has been also much benefited by it.

GEORGE BROWN.

(FROM DANIEL WOODRUFF, ESQ., GREY, HURON COUNTY.)

I have great pleasure in testifying to the excellence of the Super-Phosphate I purchased from you this spring. I applied the article to clover, but not to the entire field, and I am sure that I am quite safe in saying that the clover crop was trebled where it was top-dressed with your manure. The rest of the field carried but a fair crop; in short, the thing paid.

To Messrs. Peter R. Lamb & Co., Toronto.

I am, yours very truly,

DANIEL WOODRUFF.

(FROM JAMES WALLIS, ESQ., PETERBORO')

GENTS.—In regard to your Super-Phosphate of Lime, I have great pleasure in testifying to its beneficial qualities to Root Crops and Vegetables in general. I put a small quantity on about a quarter of an acre of Turnips in the middle of a field, and a passer-by can easily distinguish the superiority of the crop in that part of the field. I purpose using it more extensively next year, as I consider it a most valuable manure, and as far as I am a Judge, the quality is good.

To Messrs. Peter R. Lamb & Co., Toronto.

I am, your obedient servant,

JAMES WALLIS.

(FROM WM. YOUNG, ESQ., WHITBY.)

GENTS.—The Super-Phosphate of Lime you sent me gave me great satisfaction; the greater part of it was sown on Barley, and when my neighbours, both east and west, had their crops flattened, so that some had to be cut with a mowing machine more exposed to the storm, was all standing good, so that I cut round the whole field with the reaper. I tried one barrel on Spring Wheat, which proved its good qualities, the wheat being stronger on that acre, and about four or five days earlier. I also tried an acre of Turnips, dugged all alike, and then I put on at the rate of one barrel per acre of the Super-Phosphate, which, from the first to the present, is quite superior to any of the rest of the field.

To Messrs. Peter R. Lamb & Co., Toronto.

I am, Gentlemen, yours respectfully,

WM. YOUNG.

(FROM WM. WHITELAW, ESQ., GUELPH.)

GENTS.—In reference to the Super-Phosphate of Lime purchased from you last spring, I have to state that I applied it on my Turnip Crop, and the result up to the present time is entirely satisfactory, as I shall have a large crop, but I will be enabled to state more fully hereafter as to actual results, as by way of experiment I have in the same field used barn yard manure and Bone dust—the latter at the same cost per acre as the Super-Phosphate—and also applied the Super-Phosphate both with and without manure of any kind, but if I should judge from present appearance, the crops will be decidedly best where Super-Phosphate has been applied.

To Messrs. Peter R. Lamb & Co., Toronto.

Yours truly,

WM. WHITELAW.

A MANURE EXPERIMENT.

To the Editor of THE CANADA FARMER:

SIR,—The subject of manures, and the merits of different kinds being frequently discussed through your valuable paper, I take the liberty of giving you the result of an experiment made by me last season on a field of turnips for the purpose of testing the qualities of different manures, a part of the field getting no manure of any kind. All the manures were put in the drill and ploughed under, and the various lots were sown about the same time, and received the same treatment through the summer. When taken up, a quarter of an acre of each lot was staked off and carefully measured, giving the following results. If taken by weight, the yield in each case would have been much greater:

Lot without manure of any kind produced at the rate of.....	760 bushels per acre.
Lot with 600 lbs. bone dust per acre, cost \$7 50.....	834 " "
Lot with 12 loads barn-yard manure per acre.....	550 " "
Lot with 350 lbs. super-phosphate of lime per acre, cost including freight, \$7 50.....	825 " "
Lot with 220 lbs. super-phosphate, 67 loads of manure per acre.....	635 " "

The super-phosphate was purchased by me from P. R. Lamb & Co., Toronto. As to whether it will pay to purchase these manures, I will leave your readers to draw their own conclusions.

GUELPH, March 22, 1867.

W. W.

FARMERS, REMEMBER THAT LAMB'S SUPER-PHOSPHATE OF LIME WILL  
**RIPEN YOUR CROPS FROM 10 TO 15 DAYS EARLIER AND INCREASE THE YIELD 100 PER CENT.**

**TRY IT.**

Send in your Orders early to insure to have them fulfilled.

TERMS—CASH, TO ACCOMPANY ALL ORDERS.
