### Quarantine M

Inspector Chalmer's reports on the issue have given rise to discussion amongst Canadian beekeepers far and wide, the feeling being that something more needs to be done that soon, to protect our colonies from the devastating attacks of the Foul Brood. Inspector Chalmer has for some years advocated the system of isolation and static colonies of bees cared for by competent persons, and last month, he suggested that the bees in a certain date be inspected and should be inspected and colonies shipped to the quarantine for treatment or destruction. Another method of quarantine we would like to draw to the attention of our readers. In Massachusetts, on the discovery of the Foul Brood in an apiary, a written statement shall be given by the owner or person in consequence may not be moved any of the bees or the premises until release written notice. Although quarantine cannot be carried out in the case of bees, yet a measure should prove very valuable in the case of disease within bounds. This method still more appears to us that an embargo placed upon every colony areas. Such a measure somewhat arbitrary to some would prove to be very
