

July 27, 1910.

week fetching 10 1/2 to 10 5/8 a lb. at factories, with a few cheeses here and there selling at a fraction more or less. The advices from buy was due to the stronger stream of orders for prompt shipment and also for cold storage purposes, showing that some of the British importers have faith in Canadian cheese at present prices, in spite of the heavy make of English cheese going on, and the prospective large make of New Zealand next season.

The receipts are keeping fairly well, though by no means equal at present to those of last year, and it is quite evident that there is a much smaller market here this season owing to the large proportion and thereby swelling the output of butter, being exported to the United States, at the expense of the cheese factories. The main in Eastern Ontario, however, is reported to be the heaviest in last year up to date, but there is some prospect of a falling off in some districts owing to the prolonged dry spell.

The market for butter is very firm, and prices are well maintained at the advance and prices, owing to the good general demand for the best butter offering, partly for cold storage purposes, and partly for shipment to Great Britain, and to meet the about Montreal. There is no memory butter has been selling at from 22 1/2 to 26 c a lb here, with other grades at about 22 1/2 c.

CHEESE MARKETS

London, Ont., July 19-184 boxes of cheese offered; 169 white and 15 orange colored; 10 c for both white and colored; 35 c for 1 lb.
