Mr. Jas. Bell, of Thorah, is enjoying the distinguished honor of having his likeness presented to the people of the Dominion by an energetic medicine firm. The likeness does not flatter Mr. Bell.

It was reported in town on Friday that Mr. William Smith of 2nd Concession, Thorah had his hands and feet so badly frozen as to require amputation. On enquiry the report was found to be untrue.

It is stated that fourteen new cottages will be erected in Ethel park before the 1st of July next. The park is a most desirable place to spend the heated term and land for building may be obtained at a very reasonable price from the owner, Mr. A. Hamilton.

Several of our young people who went to Brechin to take part in the C. M. B. A. concert at that place on Thursday were storm-stayed and did not reach home until late on Monday afternoon. They report having been royally entertained by the people of Brechin.

Conductor Lethbridge has a record of longer service than any other trainman on the Midland, having been in the company's service for over thirty-one years.

Mr. E. A. Macdonald in his advocacy of an aqueduct for power purposes in Toronto, gives the following about Lake Simcoe and its value:—About 40 miles north of Toronto, and 47 feet above it, lies a body of fresh water known as Lake Simcoe. It is one of the greatest lakes in the world (the great chain of lakes excepted). It is 300 miles in extent and forms an unequalled reservoir. This lake receives the water of about 1,400 square miles, and the water of 4,200 additional miles can be diverted into it, making 5,600 square miles in all. To give some idea of what this means, let me state that the available surplus water of a single mile exceeds 41,817,000 cubic feet, or 2,502,001,200 pounds. That means that the entire area would yield a daily supply of 21,945,722 tons every day in the year. This unthinking volume of water falling 47 feet will yield over 700,000 horse power for ten hours each day, after making all proper allowance for flow, friction, and transmission. No place or people in the world have such an illimitable mine of wealth as Toronto.

## PUBLIC NOTICE.

In the interest of our customers and seeking justice for ourselves we are obliged to correct certain misleading statements which have appeared in the journals of our picture-producing apparatus. Let us begin by denying that we "flatter" our subjects as this is one of the charges with which we have been confronted. This, we suppose has resulted from the judges' too great familiarity with unfinished pictures and of which they may be convinced by examining one of our photos and the facts of our subject at the same time and in the same position. Again we deny photographing anyone through a newspaper as we have been charged with instigating a certain "local" that appeared in this journal of Feb. 8th, as such literature does not find a place in our cranial vocabulary. Our customers will find that theirs is the first interest considered. With thanks for your liberal patronage we are

BELL, the Photographer.
