

This Book is not for Sale

BUT IT IS FREE TO YOU FOR A 2-CENT STAMP TO COVER POSTAGE

From cover to cover, its practical directions for erecting every farm building—great and small—are so valuable that it is absolutely protected by United States copyright and can only be secured from us.

It is brimful of detail plans, sketches and the latest building hints.

This book is for complimentary distribution only. Send your address at once—ask for free copy of Bird's "Practical Farm Buildings." Not a theory in it, but practical advice by an expert authority. Incidentally it gives you information on the roofing question which anyone who believes in getting his money's worth will be mighty glad to have. Tell us when you write if you're interested in roofing.

Locking the barn door is good as far as it goes, but there's danger to stock from quite another source.

Guard against dangerous dampness and draughts. PAROID READY ROOFING (sold under money-back guarantee) is absolutely tight in the hardest storm.

But this is one reason only—you will learn the others and a great deal more when you get the book.

DON'T miss the book—send for it—send NOW.

F. W. BIRD & SON, Est. in U. S. A., 1817. (Dept. 8), Hamilton, Ont.

DEERING MACHINES

MAKE SURE OF RESULTS

MONEY making farmers all belong to the class who are ready for each season's work when it comes.

It is of greatest importance to be ready for the grain harvest. It is double waste to lose any part of the grain after the labor and expense of growing it.

The most important step is to purchase one of the old reliable Deering harvesting machines.

Then you can go into the field knowing that the work will go right along. There will be no breakdowns or delays.

You can do fast work and good work, and it does not matter about the condition of the grain. Whether it be long or short, thick or thin, even lodged and tangled, the Deering harvester will save it all.

If your grain is dead ripe or you have a large acreage to cut, you will want to crowd the work. The Deering harvester will enable you to do it.

Machines are made in 5, 6, 7 and 8-foot cut. If you keep the working parts oiled, you can keep your machine going till you are through, and not be troubled with vexatious delays.

The famous Deering line includes, in addition to harvesters, binder twine, mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers, corn machines and knife grinders. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scufflers. Also gasoline engines, cream separators, hay presses, wagons, sleighs and manure spreaders.

Call on the local Deering agent for catalog and all particulars or write to any of the following branch houses:

UNITED STATES CREAM SEPARATORS FOR 1908

Have all the qualities that have made the U. S. the standard for many years past, for efficiency, durability and reliability, and have in addition

New and Important Improvements

both in construction and efficiency—increasing their already unequaled ability to handle milk most easily, quickly, profitably. Remember: you are buying a cream separator first of all to get all the cream—all the money—out of your milk and the U. S. Cream Separator continues to

Hold World's Record for Clean Skimming

for fifty consecutive runs, in competition with the leading makes of separators of the world. This record has never been equaled.

Furthermore: the past sixteen years have conclusively demonstrated the durability and the unequaled reliability of the U. S. Dairymen to-day buy the U. S. because they know it will do for them the best work for the longest time. Competing separators "claim" anything and everything, truthful and otherwise, but the real superiority of the United States Cream Separator has been so thoroughly established in every way, that no one can successfully dispute it. This is so widely known and acknowledged nowadays that dairymen in all parts of the country are rapidly exchanging their old style, unsatisfactory, "cheap" and unreliable separators for the clean-skimming, STANDARD and reliable U. S.

"SCALECIDE"

SAVE YOUR TREES THIS FALL DON'T WAIT TILL SPRING

Or they'll be killed commercially by San Jose Scale. Spray with Scalecide, it kills every insect it touches. Cheaper than lime sulphur or any home-made mixture. Easier to apply, non-corrosive, non-clogging, 92% oil—the largest amount with less water than is found in any spray discovered. Order a 50 gallon barrel at \$30, duty paid, makes 800 gallons mixture. Works well in any machine. There's nothing cheaper. Free special booklet. B. G. PRATT, CO., Mira., N.Y.

SPRAMOTOR CO., Sole Can. Agents,
1095 King Street, London, Canada.

Price, by mail, \$1.

Free catalogue for post-card. SPRAMOTOR, Ltd., 1056 King Street, London.

Nozzle This illustrates the Spramotor Nozzle, Fig. 56, designed to apply lime-sulphur mixture. It is made of brass, with brass or steel removable discs, or with aluminum cap and body, and brass or steel discs. The particular merit of this type of nozzle is in the large liquid ways that prevent clogging, and the double ways being at an angle that gives the most perfect form of spray. We believe, for the purpose of spraying with lime-sulphur, or any coarse materials under heavy pressure, it will be found unexcelled.
