

KNIVES CUT WHEN WHEELS START

No flying start needed with a No. 8 Frost & Wood Mower, because we build our mowers with the internal gear instead of the external variety. The large gear-wheel with inside teeth encircles the engaging pinion inside, they both travel from left to right, are always in mesh. They do not jar away from each other, neither wedge nor slip. This prevents rapid wear. Moreover, there is no lost motion.

This Mower is uniformly popular among farmers, because it is so convenient, of just the right weight, cuts such a clean, even swath, and is so readily manipulated. It is strong, rigid, durable; being made of highest quality of steel and malleable iron. The large sized Roller and Ball Bearings at all points of friction make it quiet and bring little neck-weight on horses. The pitman jaws are raised fully two feet from the ground in passing obstructions, and folds back when passing through gates or going a long distance in road or laneway. No. 8 Mower is made in 4, 5, 6 and 7 foot widths. These are only a few of a score of good reasons why you should own a
