#### RECORD FOR THE CUSTOMS REVENUE.

The ever increasing volume of Customs receipts which has been such a feature of the administration of the Department by the Hon. J. D. Reid is shown in the returns by the eleven months of the present fiscal year. The revenue for the eleven months was \$103,485,000, compared with \$77,716,000 for the corresponding eleven months of the last fiscal year. This shows an increase of \$25, 769,000 or, in other words, the increase for the eleven months of this fiscal year is greater than the entire Customs revenue for the fiscal year 1898-99 which was \$25,734,000.

In order that the bounding revenue from Customs alone may be appreciated the following statement shows the collections for the first three years of the Liberal administration The first year of the Laurier reigme showed a Customs revenue of \$19 891,000. For the year 1897-98 the revenue was \$22,157,000 and only in 1900 did it reach \$28,000,000 or slightly over the increase for the eleven

months of the past fiscal year. This splendid showing not only bears ample testimony of the remarkable prosperity throughout the Dominion but also testifies to the business-like administration of the Department by the present Minister of Customs. When the Hon. Dr. ray difficulty is quite likely to be Reid took charge of the Department this year, and if so there will its affairs were in a somewhat deplorable condition. The staffs of the various ports were composed mainly of elderly men who were appointed principally for their political services -more so than for their ability to protect the revenue. This has all been changed and throughout the Dominion now there is an army of young hat the Grit obstructionists are and active men engaged in Customs Ottawa is by continued talk work, and the revenue is thereby ad-

> The revenue for the month of February was \$9,155,000 and for the corresponding month last year \$7,447,-000, being an increase of \$1,707,000.

The Premier, Near Pretoria, Is the Hugest In the World.

BIGGEST DIAMOND MINE.

Twenty-five miles east of Pretoria what is known as the Premier Dia mond Mine, the biggest in the world, where 15,000 Kaffirs may be seen any day, digging, drilling, and loading trucks of "blue" earth, from which are extracted diamonds to the value of something like \$10,000,000 per an-

The total value of diamonds export from South Africa in a year i about \$42,000,000, and of this quantity about a quarter are discovered in the Premier Mine, the other two chief mines being the De Beers and Jagers-

The Premier Mine was really dis covered by Sir Thomas Cullinan, the present chairman, after whom the great Cullinan diamond of 3,025 carats, named. It may be remembered that this diamond was presented to King George by the Transvaal Government, and was cut into eleven flawless stones, the largest of which is in th Imperial Crown.

The Premier Mine possesses an area of 3,500 claims, equal to eighty acres, and at the present time 12,000,006 loads of treatable "blue," as the diamond-yielding earth is known, are dealt with every year. And such are the resources of the mine that it is calculated that during the next forty years the present annual output will be easily maintained.

At present the mine is about 350 feet deep, and it is considered practical, according to The African World Annual, to work to a depth of 1,500 feet. The quality of the stones discovered is easing in value with the depth, and, in order to encourage honesty among the Kaffirs, a payment of 75 cents a carat on all stones found and delivered to the compound managers

is paid.

In addition to the 15,000 Kaffirs, there are 1,000 whites working in the mine in various capacities. It is won-derfully equipped with electric plant sight after sunset, with "a thousand electric lights twinkling, eight great searchlights concentrating on smoke rising from the mine after blast-ing, and many thousands of natives rushing down the side of the mine, shouting and singing merrily, to re-sume work for the night shift."

Dr. Ormsby is the son of a former Irish judge. He was educated at Dublin and Durham Universities, and held several appointments in the North of England. From 1885-93 he was vicar of St. Stephen's, Walworth. In 1893 he was appointed Bishop of Honduras and Central America, which post he held until 1907, when he was appointed chaplain of the British em-

bassy in Paris.

Dr. Ormsby tells a good story against himself. After a lapse of many years he visited a village where he had held a curacy, but nobody recognized him. At length he came across nized him. At length he came across the wife of the parish clerk, and her

Society Realty Agents.

Society women in London have taken up the business of house selling, finding it, doubtless, a far from un-profitable speculation. Mrs. George Cornwallis-West was one of the first to go in for a little work in this line; taking a house in Great Cumberland Place, she furnished it very beautifully, lived in it, and gave parties there for a short period, rented it furnished to Madame Melba for a season, and then sold lease, furniture, and all at a good profit.
