August 26, 10 a. m.-Dr. Bliss at 9.30 ly stamped upon commercial affairs this morning telephoned to his wife the perly cared for he will probably recover "Most respectable parties, have affidavits that even he who runs may read, unnight. He said his pulse was less frethat even he who runs may read, unrelled them up, and no doubt the Commissioner shared the plunder." What next? Salmon after spawning are not fit to eat. Even the Indiansabove alluded to threw the closes his eyes to what is going on ed and restored to their native element, and it is a well established fact, that numbers of view,—the present era of advancing grateful to him, and his general condition appeared to be a little improved. The

A LITTLE HOPE. August 26 .- 12:00 noon .- Mr. Blain which are swallowed up by useless Commissioners, Inspectors and Fishery Officers."

I have fortunately before me the Fishery officers. These are facts which no statements for 1880, giving a detailed statement of expenditure &c., by which it appears that the total outlay amounts to \$86,162.55.

Collections, \$19,423.16, thus making the total cost to the country, only \$66,739.34!

Well do I remember when the law regulations the salmon fisheries throughout the salmon fisheries throughout the first of the manufacturers of other countries. These are facts which no amount of political missionary effort on the part of Mr. Blake or any other total cost to the country, only \$66,739.34!

Well do I remember when the law regulations the salmon fisheries throughout the salmon fishery of the manufacturers of other countries. These are facts which no case than last night, on account of the case than last night, on account of the inflamed gland through the ear. The general condition of the patient, however, was not materially changed during the morning; the pulse has been fairly steady, but is now a little higher than at 8.30.

The Post's Washington despatch says to more feeling a little says the surgeons are feel says the surgeons are feeling a little

the President's throat was troubling him wrong will never come right."

In conclusion I would remind a Matathose well versed in politics who are
phlegm at the cost of a good deal of pain. pedian Settler—that vagabonds—burning firmly of the opinion that the reticence one in a position to know says the pus maintained by the leader of the Op. is no longer healthy, but thin and watery, of Fegian doctrines—of dynamite and in-fernal machines—which no christian or right handled free trade policy of the past ninded man can countenance or tolerate, will not at the election in 1883 be in the sick room are said to be those in laid down as one of the planks in the platform of the Grit party. There have been mysterious suppose affect. have been mysterious rumors affoat His affairs were in order and there was that in order to catch the popular nothing he wished particularly to do. vote an attempt will be made to in troduce a partially protective policy, a sort of half way arrangement believe forms another complication in tween the wisdom of the present.

policy of the Government—for as stated by Sir. L. Tilley recently at Yarmouth, out of twenty six Ministerial seats made vacant since the general election, the Government had stated by Sir. L. Tilley recently at Yarmouth, out of twenty six Ministerial seats made vacant since the general election, the Government had stated by Sir. L. Tilley recently at Yarmouth, out of twenty six Ministerial seats made vacant since the general election, the Government had served by Sir. L. Tilley recently at Yarmouth, out of twenty six Ministerial seats made vacant since the general election, the Government had served by Sir. L. Tilley recently at Yarmouth, out of twenty six Ministerial seats made vacant since the swollen parotid has subject being "The Equestrian Order in the Roman Republic." Having been selected. His mind continues clear. The verdict as to the wisdom of the trade dications in the President's case have con general election, the Government had retained twenty four, while of twelve possibilities of recovery in the judgment Opposition constituencies opened up, of his surgeons have increased and are one of the assistant masters of Rugby the Government had redeemed six. increasing.

(Signed.) In two years the Mackenzie party have lost twenty supporters, and the Executive Mansion :- Secy. Blaine Canada has during the past few Government majority has increased weeks visited a number of places in from eighty to ninety. These facts o'clock continues as favorable as could one of hopefulness. Two or three days more of improvement will be needed to Unofficial, 11 p. m.—Dr. Woodward reports at this hour that the President's

ondition continues favorable: his temwhich in my youthful days afforded employ- of the protective policy of the Gov- ment to 200 smacks, of from 20 to 50 tons burthen, and yielded a yearly profit to that Island of some £25,000 to £30,000. Where will be of such a character as shall shall convince the Reformers, once the Reformers, once the Reformers, once the Reformers, once the Reformers and in 1883 in germanination but his pulse when last they will render such a verdict as shall convince the Reformers, once the Reformers, once the Reformers, once the Reformers and in 1883 in germanination but his pulse when last they will render such a verdict as shall convince the Reformers, once the Reformers, once the Reformers and in 1883 in germanination but his pulse when last they will render such a verdict as shall convince the Reformers, once the Reformers are the Reformers. August 28.—9 p. m.—The improved ondition of the President continues 1874; was select preacher at Oxford 1874-75, and held the post of honorary Although the President's pulse and perature rose slightly during the afterchaplain to the Queen, 1874-76. on, he continued to do well and at a o'clock Gen. Swain telegraphed a friend that the improvement in the President's condition is still maintained: all are hope ful; some are confident."

About the middle of the afternoon the President expressed a desire to see his daughter Mollie, and when she entered the room and came to his bedside he took | who wishes to come out to New Brunswick. her hand and asked about her health. She replied she was well and inquired how he himself felt. "He said: "I am better; ask your mother if the boys cannot come in." Soon afterwards James came to the bedside and was greeted by his father very affectionately. The President's pulse began to rise with the excitement and emotion of the interview with children, and it was thought best not to allow Harry to see him. Late this af-ternoon Mrs. Garfield and her daughter Mollie with Mr. Rudolph and C. R. Rock well, of St. Louis, went out for a ride. Mrs. Garfield looked bright and cheerful notwithstanding the terrible nervous strain which she has borne with such conquerable courage for eight long weeks, and as the carriage passed through main gateway on Pennsylvania a avenue, around which a crowd had lingered all day, she responded with a bow and smile to the salutations of the guard and to greetings of one or two acquaintances who were passing. Some one standing near the gateway cried, "that's standing near the gateway cried, "that's Mrs. Garfield," and by a sudden and spontaneous impulse almost all the men in the crowd stood with uncovered heads, o show in the only way they could their profound and tender sympathy with her suffering, and their respect and admiration for her noble courage and undying that the new departure will give an im-

faith.

August 29.—Official bulletin, 8.30.—
The President's symptoms this morning am going to ask of you as a favor to make are as favorable as yesterday at the same hour. He slept-awakening at intervals -the greater part of the night. At these nourishment administered. His mind ontinues perfectly clear. Pulse 100: temperature 98 5-10; respiration 17.

amination is very satisfactory. The febrile rise did not begin until about a quar- any Indians, and a large birch canoe filled with salmon roes. I asked the men how many salmon they had destroyed, the answer was 56 in two nights. I leave the reader to judge what may have been the total quantity prosperity which has dawned upon our lost given by the presence of a considerable of the salmon roes. I asked the men how many as a people we shall be found contributed as a people we shall be found temperature and pulse are a little higher than last night, the former being above ge what may have been the total quantity prosperity which has dawned upon our toms this afternoon and evening are of the gravest character. The condition of the gravest character. The condition of swelling which was removed at the evendestroyed, in the same manner from the Restigouche to Cape Chat alone.

"The poor sickly things Mowat calls young salmon, never come to any thing." Another assertion which I defy a settler to prove. In 1378 some thousands of these sickly things were transported by land from Gaspe Basin to Grand River, and the men having rested here during the heat of the day, I took out six, which I kept in a glass of the country—the progressive steps day, I took out six, which I kept in a glass globe upwards of a month, and finally results and the country are so plaindent's stomach holds out and if he is pro

S. Andrew's Church.

As stated in our last the Most Reveren Even the Indians above alluded to threw the fish into the river. For I suppose these are the fish spoken of. At Gaspe Basin the fish spoken of. At Gaspe Basin the fish spoken of the fi ed and restored to their native element, and it is a well established fact, that numbers of the fish so marked, have been caught by the the fish so marked, have been caught by the prosperity, under the regime of Sir dector expressed himself hopeful the poculiar interest and impressiveness, and load of ashes. In this Province there is it here. The star says—The sportsman commodation of the large congregation. factor towards heavy crops. asked what be thought of the law now? After going into some details, as to the benefits going into some details, as to the benefits later derived he coolly said, "Fact is Sir, leads derived he lies in a state of coma nearly song was then proceeded with, including song was then proceeded with, includin we were a set of fools!"

Let not a Settler suppose that the writer is one of those who would wield his per the prejudice or injury of the party with which they are associated.

and Quebec Railway.

The Ontario and Quebec Railway is now making sufficient progress to assure the large portion of the public interested that its construction is now no longer a matter of uncertainty. See adv. for new announcement of Of the million dollars of stock which cheap excursions in the Andover while the South West is blocked up. An opportunity will be afforded to visit Redportunity will be affor whenever deemed necessary. The charter capital is \$2,000,000.

PROGRESS OF THE FINAL SURVEY.

The final survey is now being made, and the first fifteen miles west of the town of Perth are laid out. The Comany's engineer, Mr. Lumsden, of Peterboro', expects to complete the whole distance from Perth to Toronto by the end of October or the middle of November. The section from Perth to Ottawa will be surveyed during the winter. The total length of the line, which is to be a new one throughout is only 230 miles, the preliminary surveys, which are to be adhered to pretty closely in the final surveys, havin been made on as direct a line as at all practicable between Toronto and

effects of piercing the ears for ear-rings. THE CHARACTER OF THE ROUTE. John Bolton, of Toronto, got married, Strange to say, it is not the roc country to be found at frequent inter vals between Peterboro' and Ottawa A rich vein of anthracite coal has been which presents the greatest engineerdiscovered within five miles of Victoria, B. C. It is said to be the finest on the between Peterboro' and Toronto. On A field of Russian wheat grown at will have to be made.
