President Hays Says G. T. P. Will Be Running Between These Two Points Next Spring—1. Transcontinental Over Conditions in Western Canada—No Financial Panic.

Montreal, Oct. 30.—Mr. Charles M. Hays, president of the G. T. P. Co., on his return from his tour over the line of the new trans-continental, today evening stated that by the opening of next spring the G. T. P. would be running trains through from Port Arthur to the Saskatchewan. While delays had occurred on the government section between Superior Junction and Winnipeg, Mr. Hays was confident that this section would be in good working order early next summer, and that the government section and G. T. P. sections handling traffic.

With regard to the West, Mr. Hays returned in a most enthusiastic frame of mind, and was not at all apprehensive of any financial panic or other depression during his tour. Mr. Hays made a most successful progress, having been made at Prince Rupert and Vancouver the British Columbia section of the Grand Trunk. Another hundred miles he had to travel in the interior, and especially on the western coast, where he and his party were to travel. He estimated that he would have to travel about 1,000 miles under contract east of the mountains, and about 400 miles between the east and the west to 40 miles over the mountain district. Mr. Hays stated definitely that the Government would not be able to build the line from Vancouver, and that it was merely a question of time till they started to consider to build it. In general, he considered conditions in the West good for railway work, and said he was perfectly confident of the future.
