

The Late Premier will Rest with Britain's Honoured Dead in Westminster Abbey.

Britain Opposed to the Separatist Movement in Germany—McLaughlin is Sentenced to two years Imprisonment—2,000,000 German Children to be Fed this Winter by American Society of Friends—Schooner Race Called off Yesterday.

MAIN AGAINST SEPARATISTS' ACTION.

LONDON, Oct. 31. The British Government has sent two communications to the French Foreign Office, which were received there as in complete accord with the conciliatory spirit shown by France in the recent intercourse between the two countries. The first note draws the French Foreign Office's attention to the juridical consequences which might be entailed by the separation of Germany from certain provinces. The second note contained a proposal to the French Government to send a joint British, French, Italian, Belgian and American mission to the United States to be represented on the committee of experts which will be charged with the task of making an economic investigation of Germany's capacity to pay reparations and the means Germany possesses to fulfill her obligations. Premier Poincaré did not have time today to draft replies, but as apparently not the slightest difference exists between the two governments on the questions treated therein, there is no doubt as to the nature of the replies. With respect to the Separatists' movement the French government's view is that no responsibility can be placed on it or the Belgian government, as both have adhered to the principle of letting the populations concerned act according to their own will.

The British action in this regard is inspired in the first place by the realization that the disintegration of Germany would leave no Central Government which would be held responsible under the Versailles Treaty, and in the second place by the fact that recognition of the Rhineland Republic would cause endless embarrassment to the British Government in the Cologne zone, where British troops might become involved in the delicate task of keeping order among the contending German factions. It is argued in London that it might happen that the inhabitants of

Cologne District would prefer to remain loyal to the Reich even if the Rhineland Republic were established, and since much evidence has been forthcoming to prove that the French Government favors the creation of such Republic, this would bring the British Government into conflict with France at a time when in view of the coming in of the United States to another Reparations Conference it is more than ever necessary that nothing should happen to disturb the already somewhat strained relations between Great Britain and France.

FRANCE IN ACCORD.

PARIS, Oct. 31. The British Government has sent two communications to the French Foreign Office, which were received there as in complete accord with the conciliatory spirit shown by France in the recent intercourse between the two countries. WILL LIE AMIDST EMPIRE'S GREATEST.

LONDON, Oct. 31. Former Premier Andrew Bonar Law will be laid to rest in Westminster Abbey Monday amid the solemn splendour of a public funeral service which will be attended by a vast gathering of friends of all political shades, members of the nobility, government officials and diplomats. BLUENOSE SUPPORTERS NOT DOWN-HEARTED.

HALIFAX, N.S., Oct. 31. With never a breeze above eight knots the American challenger Columbia ghosted along over more than half the Halifax ocean course to-day in lead of the champion Bluenose, sometimes as much as half a mile ahead; but the efforts of the skippers and crews to sail the second race of the series for the International Fishing schooner championship were of no avail, for with only one hour of the allotted six left, not much more than half the course had been covered and the Bluenose with the advantage of the windward position reached the finish line far ahead of the Columbia. As on Monday the Canadian vessel thrived on the lopp which the wind of last night threw up while the Gloucester vessel seemed to be thrown off.

CHICAGO, Ill., Oct. 31. Major General Henry T. Allen, who commanded the United States forces on the Rhine, announced to-day that plans were being made to feed two million German children this winter through the medium of the American Society of Friends. General Allen, who returned from a visit to Germany last July, declared, "A very grave situation and one with which Germany itself is not able to cope" exists in the former enemy country.

An Appreciation

Mr. W. J. Darcy,
Manager Prince's Orchestra,
City.

I desire to record my personal appreciation of the services rendered by your Orchestra during the series of dances given by the Bally Haly Golf and Country Club for the season just closed. Much of the success that attended these dances can be attributed to the playing of your well balanced orchestra, and your willingness at all times to respond to repeated encores led us, I am afraid, to impose on your good nature on more than one occasion.

I would like to express my personal appreciation to each of your associates, and in closing express the wish that, when the season of 1924 rolls around, we will have the privilege of your co-operation at the fortnightly dances.

Yours very truly,
T. V. HARTNETT,
on behalf of Dance Committee.

Cattle Driving in the Streets

A matter to which the attention of the S.P.A. is directed is the manner in which cattle are ill handled as they are driven through the streets. Last night, about five o'clock, a steer which had all the appearance of being either wild or frenzied, through its treatment, was led, or rather dragged along Water Street by three individuals who kept it from running amuck in the dark among the pedestrians, by hanging on to a rope, a loop of which was tightly fastened round its nose. It frequently fell heavily on the slippery street which only added to its terror. Frequently in the busiest part of the day cattle are driven through the streets to the danger and inconvenience of pedestrians, and often in the care of boys of whom the animals really have complete charge.

Look in Ten Days

See the whiter teeth appear
when you combat the film

Your druggist this week has 10-Day Tubes for a new way of teeth cleaning. Millions now employ it. You see its results in prettier teeth wherever you look today.

Now we urge you to learn what it means to you and yours. The test is delightful, the results are amazing. So find them out.

The fight on film

Dental science has in late years started a fight on film. Film is that viscous coat you feel. Under old brushing methods, much of it clings and stays. Soon it becomes discolored, then forms dingy coats. That is why teeth lose luster.

Film also holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay. Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea.

Fewer escaped tooth troubles, fewer had glistening teeth, under old-time brushing methods.

Now research has discovered two effective film combatants. One disintegrates the film at all stages of formation. One removes it without harmful scouring.

Able authorities proved these methods by many careful tests. Then a new-type tooth paste was created to apply them daily. The name is Pepsodent.

Careful-people of some 50 nations have now come to employ it, largely by dental advice.

Night-and-day aids

Pepsodent also multiplies the alkalinity of the saliva—the neutraliser of mouth acids. It multiplies the starch digestant in the saliva—put there to digest starch deposits.

These factors act as tooth-protecting agents. Every use of Pepsodent gives them manifold effect.

Protect the Enamel

Pepsodent disintegrates the film, then removes it with an agent far softer than enamel. Never use a film combatant which contains harsh grit.
