The Nurse told
Her to Give
OLIVEINE EMULSION

THE GREAT HEALTH RESTORER

South Brookfield, Queens Co., N.S., Oct. 1919.

"Our little girl was very sick with Stomach Trouble and different doctors were recommended, but everything failed until a nurse told me to give her OLIVEINE EMULSION. She is now a big, healthy baby and I would not be without it in my house. It cures colds and is a health builder. It is the best to be had. We recommended OLIVEINE EMULSION to quite a few who were suffering from the effects of influenza and they used it with good results." (Name on request)

OLIVEINE EMULSION is more than an ideal cough remedy, to pave the way for a quick recovery from heavy colds and deep-seated coughs. It is a body builder—gives strength to the weak—tones up and invigorates the whole system. It is pleasant to take and is agreeable to the most sensitive stomach.

Sold everywhere.
Prepared by
Frasier, Thornton & Co. Limited, Cookshire, Que.

THESE BEVERAGES COME
WITH THE LAW.

Ready's Beer

These beverages surely satisfy the craving thirst. Drink them for their appetizing zest, full, palate-pleasing flavor. Drink them for their ability as a thirst quencher. Drink them because of their power to refresh, revive and invigorate.

You will be delighted with their unusual qualities.

Buy them from your local dealer or direct from St. John.

Ask for prices.

To the Editor of The Graphic,

Dear Sir:—

The readers of the Graphic will remember that at the last Council Meeting at Dalhousie, I tried to get a resolution passed, and sent to the Minister of Lands and Mines regarding matters in connection with lumbering and farming along the I. N. R. I consider my contention was a reasonable one and should have been supported by all except those who had an axe to grind. In my calling as mill-furnace builder for Richard Co. and others, I have been called to do work on the I. N. R. at nearly all seasons of the year, and having to do with farming myself as well as brick and stone, since I was a boy, my father following the same calling, I think with all the adverse circumstances connected with farming in this cold country I am in a position to be as good a judge as anyone. Some may think that in drawing up that resolution I was thinking only of the lumbermen. To be plain and fair I had the lumbermen in view, but was thinking more serious of Campbellton and Dalhousie and other places that derived their living from lumber that has come, and must naturally come from those lands situated along the I. N. R.

Now Sir, in regard to my resolution I did not expect men that were drawing an easy living from the destruction of wood along the I. N. R. and expecting to get the vote. But I fully expected that every councillor in the vicinity of Campbellton and Dalhousie would vote for the resolution. Why did they not do so? The facts are that those wood-pickers are in the market and will go to the highest bidder of the two political parties.

We have been told that those deviated from their original firm fishermen camping out. Let it be known that the main river is eight miles distant from the so-called Kedgwick on the I. N. R. and that no forest fires from the said river could start on the I. N. R. without very visible traces. No fair-minded man should entertain such a conclusion. The fire at Kedgwick last summer that burned the Richards at Whites Brook at a distance of five miles, can be traced to farmer's clippings. Somewhere about two to five square miles of timber land were burned last summer. This land is now a story in that vicinity alone and is only unit for cultivation. I am now speaking of land I have seen around Kedgwick and Whites Brook and would say that no man of good judgment would settle on it to farm. West of Kedgwick is not personally known by me except that it is given to only firs. I have not yet said that firs should not be taken along the I. N. R. but say positively that good judgment has not been used so far, at least, and no time should be lost in as far as possible of obtaining correct knowledge of lands suitable, if any, for farm purposes. There is one thing that in conversation with other men I have seen and said, and more I see of destruction of wood by fire, cutting and farming that I am right. The question is this, should a man getting land from the crown have full control of land, use it as he pleases, I think he should not. There are many ways in which the laws of the land interfere with a man's so-called liberty, and I think the cutting of lumber should be in the list, and that we as representatives of the people in the county council, and having a fuller knowledge of the land workings and requirements of the country in all its branches of industry, lumbering, farming, etc., should request the members elect to pass legislation of wood early to prevent the total depletion of lumber on granted lands. Some may question the power of the Government to do so, but the highest legal tribunal of the State of Maine ruled that it was constitutional for a state to regulate even the size of trees a man may cut on his own private land, and every one that bought land out of country.

Now, Sir, to return to the question of supply, most of this supply of wood goes from our Canadian forests and in a very few years nearly all will have to come from abroad. What are we going to do, are we going to look calmly on and see an annual drain of raw material shipped out of our country, giving us about 18 million dollars, which if manufactured into paper would net us 30 million, and at the same time have our money discounted 17½ cents on the dollar. Canada forgets that she is the only country that has herself poor all this time the U.S. was looking on and making gains by our loss. Is it fair that they should discount our goods and we should be allowed to impoverish our country to the difference between 18 and 30 million dollars annually, surely not. There are two or three ways to the shipment of the wood can be prevented one by an embargo, or export duty created by the provincial governments, and the other by a combination of all Canadian mills purchasing all this free land wood year by year and making a division on a basis of the cheapest rail haul to the various mills. The settlers and farmers will also be benefited. As with this wood all points in Canada will have a market for their home, not only for his wood but a larger and better market for his farm produce as well. Allow me to say there is too much of our forests turned into pulp, which will be dealt with at a later date.

Let me say a word in regard to taking up land to farm on. If I was taking up land as above stated, I would leave about 50 acres, the remaining 50 would be lumbered carefully. I would leave the other 50 acres in its very year and get all the fallen trees, the full grown and those showing signs of decay, in that way I would have with proper care and wise cutting a guarantee of living. The summer could be spent in the cleared part, and the winter in wooded part. This would seem only reasonable conditions for any Government to impose in granting land. It would be better for the individual, the Government, the country as a whole. There is no doubt that might be said, but space does not permit.

Let those who voted against my resolution.

As I have already said, if I was taking up land as above stated, I would leave about 50 acres, the remaining 50 would be lumbered carefully. I would leave the other 50 acres in its very year and get all the fallen trees, the full grown and those showing signs of decay, in that way I would have with proper care and wise cutting a guarantee of living. The summer could be spent in the cleared part, and the winter in wooded part. This would seem only reasonable conditions for any Government to impose in granting land. It would be better for the individual, the Government, the country as a whole. There is no doubt that might be said, but space does not permit.

TORTURED BY TERRIBLE ECZEMA

Suffered Three Years Until She Tried "FRUIT-A-LIVES"

DAME PETER LAMERRE

Pointe St. Pierre, P. Q.

"I think it my duty to tell you how much your medicine has done for me. I suffered for three years with terrible eczema. I consulted several doctors and they did not do me any good.

Then, I used one box of 'Sootha-Salva' and two boxes of 'Fruit-a-Lives' and my hands are now clear. The pain is gone and there has been no return. I think it is a marvellous cure because no other medicine did me any good and I tried all the remedies I ever heard of, without benefit until I used 'Sootha-Salva' and 'Fruit-a-Lives'.

'Fruit-a-Lives' cooled the blood and removed the cause of the disease, and 'Sootha-Salva' completed the cure."

Dame PETER LAMERRE (64), 500, a box, \$ for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-Lives Limited, Ottawa, Ont.

I thought it subject to the laws then existing as well as any regulations that might be imposed in the future. The theory of an annual growth to supply the waste has been so freely indulged in the past has become a popular delusion and if our people have any consideration for the coming generations, the sooner they wake up the better.

Now a word about pulp wood and supply. It is beyond conception, 5 million cords, I want my readers to pause a moment when they read this paragraph, 50 million, 500 thousand cords, not feet but cords used every year in the United States for pulp and particularly in the Eastern and middle states. Few can realize just what this really means, but to try and make it comprehensible, it means a pile of four foot wood 12 ft. high, reaching clear across the continent, or a pile 4 ft. high nine thousand miles long. Who would undertake to furnish this amount of wood for even one year. Add to this the annual waste by wind, fire, spruce bud worm, ants, and many other forms of destruction. I saw a section of forest at Red River in the province of Quebec, where about one eighth of the trees were destroyed by the bear. I would say this section of country has suffered less from the ravages of the spruce bud worm than other places I have seen. I had occasion to be in the lumber woods in Kings Co. N. B. this last fall, and to my mind many of the trees could not survive. The reason our trees suffered less, was that we in this northern part of N. B. have a more vigorous growth than any other part of the province.

Now, Sir, to return to the question of supply, most of this supply of wood goes from our Canadian forests and in a very few years nearly all will have to come from abroad. What are we going to do, are we going to look calmly on and see an annual drain of raw material shipped out of our country, giving us about 18 million dollars, which if manufactured into paper would net us 30 million, and at the same time have our money discounted 17½ cents on the dollar. Canada forgets that she is the only country that has herself poor all this time the U.S. was looking on and making gains by our loss. Is it fair that they should discount our goods and we should be allowed to impoverish our country to the difference between 18 and 30 million dollars annually, surely not. There are two or three ways to the shipment of the wood can be prevented one by an embargo, or export duty created by the provincial governments, and the other by a combination of all Canadian mills purchasing all this free land wood year by year and making a division on a basis of the cheapest rail haul to the various mills. The settlers and farmers will also be benefited. As with this wood all points in Canada will have a market for their home, not only for his wood but a larger and better market for his farm produce as well. Allow me to say there is too much of our forests turned into pulp, which will be dealt with at a later date.

MAY NOT ATTEND THE LEGISLATURE

Hon. Wm. Currie's Health Not Good—Will Not Attend Session

Fredericton, Feb. 21.—Hon. Wm. Currie, M. L. A., former speaker of the New Brunswick Legislature and Central figure in an investigation which was conducted by James Friel, K., one of the cutthroats of which was his retirement from the Speakership, may not come back to the Legislature this year at all.

Shortly before the session of the house in 1919 the ex-Speaker was operated on for a serious internal trouble to take up his duties during the session as a member for Redegouche, and now, it is said, he is not likely to be on hand this year either.

This information comes from the circle of North Shore politicians who have been in Fredericton this week, all of whom have been closely associated with Mr. Currie politically. Not only one but several of them declared they didn't expect to see the ex-Speaker back in the House this year, as a result of the continued critical condition of his health.—Globe.

At Campbellton it has been understood for some time that Hon. Mr. Currie would not be able to attend the next session of the Legislature. Mr. Currie is not well and although able to be about is not equal to the exacting duties of the legislature.

DALHOUSIE CARNIVAL A SUCCESS

Many Good Costumes Worn By Shire Town Skaters.

Dalhousie, N. B.—The Fancy Dress Carnival held in the Dalhousie Skating rink on Feb. 17th was very successful, quite a number of skaters in fancy costume appearing on the ice. Miss Ellen Troy took first ladies' prize, Mrs. H. A. Trudel second and Mrs. Savoie was awarded the third prize. The prize first was won by Mr. Walter Elsliger, second Leo Blanchard. The prize-winners among the children were Eva Gaudet, 12, Gaudet, Miss M. Clifford and Master W. Cragg.

Among the skaters were the following: Miss Ellen Troy, Highland Lassie; Mrs. H. A. Trudel, Indian Girl; Miss Savoie, Fairy; Miss C. Seber, Mrs. Rabbit; Miss A. Clifford, Red Riding Hood; Miss Eva Gaudet, Italian Girl; Miss E. Barbare, Nurse; Miss E. McGrath, Frances; Miss M. V. Gipsy; Miss T. Clifford, Irish Queen; Mildred McKenzie, Farmette; Miss Gerlie Atkinson, Sammie; Miss Helen Ediger, Mary McKenzie; D. Hamilton, B. Williams, B. Buchanan, Jonette Arseneault, M. Cook, M. McNeill, all as Snow Shoe Club; Miss Mary Coleman, Fairy, Nettie Bonchard, Gipsy Queen; Miss Annie Hicks, Canada; Messrs. Walter Elsliger, Canuso, Leo Blanchard, Chinaman; W. Cragg, King of Hearts; Chas. Cabot, Prince of Wales; Emile LeCoutre, Charlie Chaplin; Don Campbell, Mother Goose; Chas. R. Stewart, Soldier; R. Seber, Uncle Sam; Leon Sansom, Engineer; Theo. St. Onge, Ghost; B. LeBlanc, A. Gaudet and P. LeBlanc, as Scouts.

Messrs. L. B. Deacon and Sydney Jamieson as Clowns; Clare Robinson, Robin Hood.

The management intended holding another carnival on March 17th and the ladies of the Church of England will as usual hold a supper after in St. Mary's Hall.

BUY AT HOME.

Practical patriotism, demands that we devote ourselves to the advancement of our country, if all the people do this we shall have a big country and not a few big cities. We must patronize our home industries and above all, if we can make our community a large, prosperous and attractive one to live in, we must support our own local stores. We must buy our goods from our own community merchants that we may have big, attractive shops and a prosperous town. Patriotism demands that we "BUY AT HOME."

solution come out above their own signature, and we will talk over this very important matter.
