J. L. Sullivan's last victim was one Michael Sheehan, who is said to be the strongest man in Iowa. He undertook to stand up before the champion at Davenport for three rounds, but after some preliminary sparring Sullivan tapped the ambitions stranger on the nose and he went to dust. The audience then shouted for Paddy Ryan, and Sullivan, rather irritated, offered to bet any money he would knock Ryan out in the second round.

Mr. James Lennox and Mr. Mike O'Halloran were to have shot a pigeon match at Olcott's, Eglinton, yesterday afternoon, but the little man of Deer Park failed to connect and he of the Library claimed the forfeit. The sports present then got up a couple of sweeps. In the first, five birds each, Harry Newman, James Bedsan and James Lennox competed. Newman missed all his birds, but the others managed to kill two each. In the other sweep, three birds each, J. James, W. Smith and Mr. Martin scored one each, while Jeff Wowled and J. Bailey for some unaccountable reason failed to tally.

Every fall it is is stated that, the champion son failed to tally.

Every fall it is stated that the champion yacht in England is going to cross the Atlantic to compete for the America's cup. There is usually no foundation for the statement, but it lends a local interest to an otherwise dry article and is, therefore duly trotted out. This year it is the fortyton cutter May, owned by Mr. N. B. Stewart of Torquay, that is coming. It respective of the fact that the May only won 14 out of the 37 races she started in this year, she is yet termed England's champion yacht, but wherein the championship lies is rather a puzzle, especially as none of her victories were of the highest class. The May was built from designs furnished by Mr. G. L. Watson of Glasgow, and is 64.04 feet in length at the water line, 11.99 feet beam, 10.9 feet draught of water, 9.3 feet deep and of 40.06 tonnage. Every fall it is stated that the champion

What is Catarrh?

What is Catarrh?

From the Mail (Canada) Dec. 15.

Catarrh is a muco-purulent discharge caused by the presence and development of the vegetable parasite ameba in the internal lining membrane of the nose. This parasite is only developed under favorable circumstances, and these are: Morbid state of the blood, as the blighted corpuscle of tubercle, the germ poison of syphilis, mercury, toxemea, from the retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal liming membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauses or back of the throat, causing ulceration of the throat, up the eustachian tubes, causing deafness, burrowing in the vocal cords, causing hoarseness; usurping the proper structure of the bronchial tubes, ending in pulmonary consumption and death.

Many attempts have been made to discover a cure for this distressing disease by the use of inhalants and other ingenious devices, but mone of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucous tissue.

Some time since a well known physician of forty years standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never fails in absolutely and permanently eradicating the horrible disease, whether standing for one year or forty years. Those who may be suffering from the above disease should, without delay, communicate with the business managers, Mesars, A. H. Naxon & Son, 305 King street west, Toronto, and get full particulars and treatise free by enclosing stamp.
