AMBURSEN HYDRAULIC CONSTRUCTION CO. OF CANADA, Limited MONTREAL

Engineers and Builders of

CONCRETE STEEL GRAVITY DAMS (PATENTED IN THE UNITED STATES AND CANADA) POWER
HOUSES AND GENERAL HYDRAULIC CONSTRUCTION IN CONCRETE.

A Concrete-steel Dam is bottle tight.
It may be inspected over every square foot of internal surface.
It may be built on clay, hard-pan or cemented gravel foundations,—and
It enormously decreases the cost of any foundation.
There is no possibility of static "floating" pressure on its base.
It has more than double the factor of safety of a solid dam.
It is indestructible by ice, water or time.
It becomes a part of the geology.
It can be built in half the time of any other dam.
It costs less to build than any other permanent dam.
It costs nothing at all to maintain.
All its advantages increase with its height.

We invite your correspondence on all subjects pertaining to
Hydraulic Developments.

Associated with the Ambursen Hydraulic Construction Co. of Boston, Mass.
