ODES—A. B. C. 4th and 5th Editions and Private Code.

A woolen manufactory is proposed at Vancouver, B.C. The owner of a large Australian sheep ranch came to Canada recently to look into the question. He was invited here by a well-known citizen, who believed there was an opening for such a factory. The C.P.R. steamship line are anxious to carry freight from Australia, and the rates quoted on wool are very low. It is stated that the first cost of laying the wool down in Vancouver for the manufacture of garments, would enable the wool to be manufactured and quoted in British Columbia, Manitoba and the North-West, so far under Ontario prices, as to make those markets sure. The scheme can be easily financed, and it is probable the factory will be built at an early date.
