

**Diseases of the Bronchi.** By Dr. F. A. HOFFMANN, of Leipsic. **Diseases of the Pleura.** By Dr. O. ROSENTHAL, of Berlin. **Pneumonia.** By Dr. F. AUFRICHT, of Magdeburg. Edited, with additions, by JOHN A. MUSSER, M.D., Professor of Clinical Medicine, University of Pennsylvania. Handsome octavo volume of 1030 pages, illustrated, including 7 full-page colored lithographic plates. Philadelphia and London: W. B. Saunders & Co., 1902. Cloth, \$5.00 net; half morocco, \$6.00 net. Canadian agents: J. A. Carveth & Co., Parliament Street, Toronto, Ont.

This, the fourth volume to be issued of Saunders' American Edition of Nothnagel's Practice, fulfils all expectations. The eminent authors of the valuable monographs which comprise this volume had, by their breadth of learning, their exhaustive research, and extensive practical experience, made their essays almost complete as originally written. Nevertheless, the author in the light of recent research, has made numerous valuable additions, so that the American edition represents the present state of our knowledge on the subjects under discussion. Among other things, these additions include new matter on the anatomy and physiology of the bronchi; on foreign bodies in the tubes; on the pathology, bacteriology and treatment of bronchitis, and the recent researches on bronchiectasis and on eosinophilia in asthma. Much new matter has been incorporated into the section on pneumonia, including the recent work of Hutchinson and others on the blood and urine in that disease. In the Pleurisy section will be found an account of the latest bacteriologic studies, and references to the work of Morse on the leucocytes in pleurisy, to that of Williams and others on X-ray diagnosis, and to the litten phenomenon. The work in every particular is thoroughly up-to-date, and no criticism is possible but praise.

**Atlas and Epitome of Diseases of the Mouth, Pharynx and Nose.** By DR. L. GRUNWALD, of Munich. From the second revised and enlarged German edition. Edited, with additions, by JAMES E. NEWCOMB, M.D., Instructor in Laryngology, Cornell University Medical School; attending laryngologist to the Roosevelt Hospital, Out-patient Department. With 102 illustrations on 42 colored lithographic plates, 41 text-cuts, and 219 pages of text. Philadelphia and London: W. B. Saunders & Co., 1903. Cloth, \$3.00 net; Canadian agents: Carveth & Co., Parliament Street, Toronto.

In designing this atlas the author has kept constantly in mind the needs of both student and practitioner, and as far as possible typical cases of the various diseases have been selected. The illustrations are described in the text in exactly the same way as a practical examiner would demonstrate the objective findings to his class, the book thus serving as a substitute for actual clinical work. The illustrations themselves are numerous and exceedingly well executed, portraying the conditions so strikingly that their study is almost equal to examination of the actual specimens. The editor has incorporated his own valuable experience, and has also included extensive notes on
