## The Banker's Magazine for 1874-5.

The completed volumes of the **BANKER'S MAGAZINE** give a full epitome of the financial history of the United States for the last twenty-nine years. During the present year, important improvements have been introduced with a view to augment the practical value of the Magazine to all who are engaged in the business of banking, or who are interested in its true principles. While the established reputation of the work as a Statistical Record will be sustained, increased attention will be given to the discussion of the questions of Banking and Currency, which are now the prominent issues of the day. The European financial movements which chiefly influence our own money market will receive special attention. Numerous Legal Decisions upon points important to bankers will also afford information often invaluable. The *Changes* continually occurring among National and State Banks and Private Bankers are promptly announced, and Monthly Lists are given of New Banks, of Dissolutions and Failures, and of changes of officers.

The volume begins with July and contains 1,000 pages. A full Index facilitates the references so constantly useful to bankers.
