

TABLE 8-12. HARDWOOD, SOFTWOOD AND MIXED WOOD ANNUAL GROWTH  
( $m^3 \cdot 10^3$ ) IN EASTERN CANADA BY DEPOSITION REGIME

|                         | Annual Growth $m^3 \cdot 10^3$<br>(Percent of Total) |                |               | Total <sup>b</sup> |
|-------------------------|--|----------------|---------------|--------------------|
|                         | Sulphate Deposition kg/ha.yr                         |                |               |                    |
|                         | 10-20  | 20-40          | >40           |                    |
| Hardwood <sup>a</sup>   | 5,082<br>(26)  | 12,491<br>(64) | 1,825<br>(10) | 19,398             |
| Softwood <sup>a</sup>   | 66,753<br>(71)                                       | 26,814<br>(28) | 815<br>(1)    | 94,382             |
| Mixed Wood <sup>a</sup> | 8,327<br>(23)  | 25,341<br>(70) | 2,760<br>(8)  | 36,428             |
| Total Annual<br>Growth  | 80,162<br>(53)                                       | 64,646<br>(43) | 5,400<br>(4)  | 150,208            |

<sup>a</sup> Hardwood and softwood forests contain 70% or more of the specified type. Mixed wood forests contain less than 70% of either hardwood or softwood species.

<sup>b</sup> Total annual growth does not include data on regions receiving less than 10 kg/ha.yr sulphate deposition.
