Company/Product

CIMA+, an engineering company, was created by the amalgamation of six consulting engineering firms which have been operating in Quebec for over thirty years. Among Canada's largest consulting engineering companies, the group now employs over 330 people, mainly in Quebec, at its offices in Laval, Montréal, Sherbrooke, and Québec. It has over 110 specialist engineers and some 180 technicians in the various disciplines.

One of CIMA+'s main areas of activity is wastewater and drinking water purification and the environment. In this field, the CIMA+ staff has acquired extensive experience while demonstrating an innovative spirit, whether it has been in supplying a municipality with drinking water, treating industrial wastewater, integrating management of household or industrial waste, or dealing with the incineration and control of atmospheric discharge of products of combustion.

Strengthened by the experience acquired over the years, CIMA+'s engineering divisions offer a full range of services including:

- . feasibility studies and pre-projects;
- . cost estimates;
- . design and preparation of plans and specifications;
- . services during construction;
- . project planning and management services;
- . execution engineering;
- . advisory services and expertise.
