

What is FaxLink International and how do I use it?

FaxLink-I has been designed for use by foreign investors and business people who are interested in receiving general information on Canada.

FaxLink-I can be reached by dialling **(613) 944-6500** from the handset on your fax machine. Once the connection is made, choose your preferred language (English, French or Spanish) and then enter the country code from which you are calling. After that, simply follow the voice instructions when prompted. We recommend that you order a Master Index on your first call, and then call back to select actual documents.

Information contained in FaxLink-I falls into five categories:

- general information about Canada
- the case for investing in Canada
- Canada's business and investment environment
- Canada's key infrastructure
- profiles of Canada's fast-growing high-technology industries

Accessing government information has never been simpler. Try it!
